Representations on this site plan may be approximations only and should not be used for purposes other than for determining general locations of critical areas. Development activities beyond the scope of this

PCA's on Pre-Existing Lots

For development proposals on pre-existing lots, other than land divisions of PUD's, PCA's need not be placed into separate tracts or easements or surveyed in by a licensed surveyor.

Instead PCA's shall be identified on a scaled site plan showing the location of the critical area and associated buffers, structures (existing and proposed) and their distances from the PCA and lot lines to show relative location within the subject parcel(s). The project shall be conditioned for critical area protection and the resulting information recorded with the Auditor. The site plan may be prepared by the applicant and all distances and locations of structures may be measured from the established PCA
