SEPTIC INC.DATE OF INSTALLATION \_\_\_\_\_ MODEL DF50d

(Occurs at date of occupancy. This date starts the Limited Warranty and Maintenance coverage of the Whitewater System.)

The purpose of this contract is to insure continued service and operation of the Whitewater® residential wastewater treatment system installed at 6067 CENTRAL AVE  
ANACORTES, WA. 98221

The Whitewater® Residential Wastewater Treatment System employs an extended aeration process. This process involves a natural biological breakdown of wastewater organic matter and includes chlorine disinfection. Semi-annual service inspections, at six month intervals for the first two years of system operation, are provided by a certified maintenance provider and are included in the original purchase price of the Whitewater® system. During an inspection the components are serviced as outlined in the Whitewater® Installation, Operation & Maintenance Manual provided from the supplier. The chlorine disinfection system is checked and refilled as needed during the six month inspections. After the initial two year service program is completed the Whitewater® certified maintenance person will provide a continued service contract renewable on an annual basis. Note that the State and County require there be a maintenance contract between the user and a service company as long as the Whitewater® system is in use. This agreement must be in effect before authorities will approve the septic design.

This maintenance agreement is for the Whitewater® Aerobic Wastewater Treatment Unit only and does not include any portion of the customer's wiring, plumbing, pump chambers, or disposal system.
