RE: Lot of Record Certifications:

PL05-0281, Parcel P48442

PL05-0282:

Parcels: P 48422, 48400, 48404, 48437, 48445, 48443

Dear Mrs. Miller:

Enclosed please find the above noted Lot of Record Certifications. The determination for each Lot of Record is based on a review of the conveyance documents submitted, including, but not necessarily limited to: the legal description contained in each conveyance document; assessing when parcels came together; when parcels were separated; and what County regulations, if any, were in effect at the time of conveyance of any specific legal description.

There are two approved Lots of Record. However, it should be noted that Parcel P, 48442, approved under PL05-0281, (17.5 acres) is substandard to the Agricultural-Natural Resource zoning designation. The minimum lot size for Agricultural-Natural Resource Land is 40 acres. Thus, anything less than 40 acres is considered substandard. If development would be proposed for this parcel, it will be necessary to combine or aggregate the entire substandard parcel with all of the Parcels that comprise Lot Certification PL05-0282.

In reviewing the conveyance documents associated with these two Lots of Record Applications, it appears that the previous owners, Rangar and Florence Peterson conveyed individual parcels to different people. It further appears that some these conveyances were not in compliance with Skagit County Subdivision Regulations in effect at that particular time.

The effect of these types of conveyances is not only to one individual parcel, but all parcels that may have been under the Peterson ownership at the time of conveyance and certainly to all of the parcels currently under the Clarice Miller ownership. The effect of the individual conveyances is that the parcels involved will now need to all stay together as one total unit.

If development or subdivision were considered, it will be necessary to sell or develop on the total acreage comprised of approximately 110 acres. This amount of acreage does not include Parcel P48438, containing an existing residence

As indicated earlier in this letter, the current zoning of the entire Miller ownership is Agricultural- Natural Resource Land. Agricultural-Natural Resource Land has a minimum lot size of 40 acres. If subdivision were proposed, it would be possible to create two 40 +/- acre parcels. Due to the property laying within a low-flow water area it appears that if subdivision were proposed, bonus density could not be utilized.

Please feel free to contact this office for further information, clarification or to discuss land division.

Sincerely,

Grace Roeder, Associate Planner  
Planning & Development Services.
