Standard, portable, fully portable, accurate, lightweight equipment with multiple channels can be used in the field to monitor the health of the heart. The equipment is used to monitor the heart's electrical activity, which is recorded on a strip of paper. The recording is then analyzed by a computer, which produces a graph of the heart's electrical activity. The graph is then used to determine the heart's health. The equipment is used to monitor the heart's electrical activity, which is recorded on a strip of paper. The recording is then analyzed by a computer, which produces a graph of the heart's electrical activity. The graph is then used to determine the heart's health.
