~~Page 10 of 10~~

Figure 1. The 1000 Genomes Project. The figure shows a map of the world with the locations of the 1000 Genomes Project samples. The map is divided into five regions: Africa, Europe, East Asia, South Asia, and Admixed American. The number of samples from each region is indicated by the size of the circle. The map also shows the distribution of the 1000 Genomes Project samples across the world.

For each of the following, write a short paragraph (100-150 words) explaining the concept and its importance in the field of psychology. Use the provided information to guide your writing. The proof must show the name of the concept and its definition.

[illegible]

in which first, middle and/or last name is misspelled. Two pieces of documentation are required.

For example, a *Journal of the Royal Society of Medicine* article on the "Epidemiology of the Common Cold" (1966) includes the following information:

* Prior order of care for child 5 years old or have been established within five years of birth
