RECITALS

a. Skagit Land Trust, (Grantor) is the owner in fee simple of real property known as the Samish Island Entrance, located in Skagit County, Washington, (Property) more particularly described in Exhibit A and as shown in Exhibit B. Exhibits A and B are attached to this instrument and incorporated herein by reference. If there are differences between these two Exhibits, the legal description in Exhibit A shall control. The property contains approximately 50.6 acres.

b. This document is an environmental (restrictive) covenant (Covenant) executed pursuant to Revised Code of Washington (RCW) Chapter 64.04; the Washington State Department of Ecology (Ecology) Grant Agreement No. SEANCWCP-2021-SkagLT-00040 (Agreement), incorporated by reference hereto; and the U.S. Fish and Wildlife Service (Service) Coastal Wetlands Grant No. F21AP00719 (Grant), which has an effective date of February 3, 2021. The Service awarded the Grant from the National Coastal Wetland Conservation Grant Program (CFDA #15.614), which was established under the Coastal Wetlands Planning, Protection, and Restoration Act (16 U.S.C. §§ 3951–3956). A copy of the Grant is kept on file at the office of the Service, 911 NE 11th Avenue, Portland, OR 97232 and at the office of Ecology, 300 Desmond

Drive SE, Lacey, WA 98504. The Wildlife and Sport Fish Restoration Program is the administrative subdivision of the Service that administers the grant.

Grantor is the subrecipient of the Service Grant and is responsible for implementing the project. The purpose of the Grant is to protect marine coastline along two bays, including beach habitat on Padilla Bay and a small creek, saltmarsh and tidelands on Samish Bay, and to protect riparian slough habitat, wetlands and open space in perpetuity for conservation purposes. The Property was acquired for \$1,000,000 using funds from the Coastal Wetlands Grant (\$650,000 or 65% of the purchase price) and the non-federal match (\$350,000 or 35% of the purchase price).

Project benefits are protecting wildlife values including eelgrass communities on both bays, forage fish spawning habitat, and foraging habitat for a multitude of bird species, including shorebirds, waterfowl, and raptors. Ecosystem processes protected include marine sediment supply and transport, tidal hydrology, detritus recruitment and retention, and exchange of aquatic organisms. Additionally, the project supports the Padilla Bay National Estuarine Research Reserve by protecting its northern edge. The Property was acquired for the purpose of permanent shoreline and coastal wetland protection and the protection of associated native birds, wildlife, and marine organisms. Grantor hereby acknowledges that the Property was acquired for this purpose, and agrees to monitor and enforce the Property in perpetuity for the conservation of said lands and waters and the hydrology and natural heritage resources dependent thereon, consistent with the terms of the Grant and applicable regulations.

c. Grantor is creating this Covenant to ensure that the Property will be preserved and managed in perpetuity for the conservation purposes described above, and in accordance with all terms and conditions of the Grant. Grantor acknowledges that the Property is subject to all terms and conditions of the Grant and the Agreement, and agrees to monitor the Property in perpetuity for the conservation of the Property's lands, waters, hydrology, and natural heritage resources dependent thereon.

COVENANT
