THE FOLLOWING INFORMATION HAS BEEN DISCLOSED TO THE HOMEOWNER AS PER SKAGIT COUNTY CODE (SCC) Chapter 12.48 Rules and Regulations of the Skagit County Board of Health Governing Individual and Public Drinking Water Systems:

- The water source that serves this property is considered an alternative pre-existing dug well that is substandard and does not meet current Chapter 173-160 Washington Administrative Code (WAC), Minimum standards for construction and maintenance of wells.
- This Status Report is binding on all my heirs and/or successors and agree to hold the County harmless from any and all claims, damages, costs or expenses that are incurred whether personal injury or property damage that are water quantity, water quality or a result of the use of this alternative source.
- Water systems with filed Status Reports will not be used as justification to create new lots. Land divisions require either drilled wells or connection to an approved public water system.
- The water source that serves this property requires treatment to meet SCC 12.48.110 water quality standards. Ongoing treatment is required recommended for coliform bacteria and other organisms in surface water and groundwater under the influence of surface water to protect public health.
- I agree to abide by the operations and monitoring requirements submitted with the water source application documents and make water quality monitoring information available when requested by the Health Officer.

Connection to a public water system, when available, is recommended by Public Health. I have read and fully understand the conditions contained within this notification.

DATED this 6 day of June, 20 2023
