DOCUMENT TITLE: TEMPORARY EASEMENT

SKAGIT COUNTY
Contract # C20230232

REFERENCE NUMBER OF RELATED DOCUMENT: *Not Applicable* Page 1 of 12

GRANTOR(S): Jennifer L. Strickland and Justin J. Braaten, a married couple.

GRANTEE(S): Skagit County, a political subdivision of the State of Washington.

ABBREVIATED LEGAL DESCRIPTION: A temporary easement located within INCLUDING MANUFACTURED HOME 1992 SKYLINE OAKSPRINGS 54X48X28 SERIAL NUMBER 32910931E: LOT 11, PLAT OF THOMAS CREEK, AS PER PLAT THEREOF RECORDED IN VOLUME 12 OF PLATS, PAGES 14 AND 15, RECORDS OF SKAGIT COUNTY, WASHINGTON.

ASSESSOR'S TAX / PARCEL NUMBER(S): P80729 (Xref ID: 4375-000-011-0006).

TEMPORARY EASEMENT

(For riparian restoration work under the Natural Resource Stewardship Program project)

The undersigned, Jennifer L. Strickland and Justin J. Braaten, a married couple (herein "Grantors" or "Landowners"), for good and valuable consideration, receipt and sufficiency of which is hereby acknowledged, hereby grants to Skagit County, a political subdivision of the State of Washington (herein "Grantee" or "County"), a temporary, non-exclusive easement ("Temporary Easement"), as provided herein. Landowners and County may be individually referred to herein as a "party", and may be collectively referred to herein as the "parties." The terms of this Temporary Easement are further provided as follows:

1. Nature and Location of Easement. The Temporary Easement hereby granted by Landowners herein shall be a temporary easement to allow the County, the County's agents, employees, and contractors over, upon, across, through, a portion of real property located within and upon Landowners' Property, such Temporary Easement area as legally described on Exhibit "A" and as further described and depicted on Exhibit "B", attached hereto and incorporated herein by this reference, for the purpose of providing a temporary easement (and any related appurtenances thereto), including the right of ingress and egress with all necessary equipment for construction of the riparian restoration work, including the removal of invasive vegetation and installation of native plantings under the Skagit County Natural Resource Stewardship Program

(NRSP) as described in *Exhibit "C"*, attached hereto and incorporated by reference (herein referred to as the "Project"). A legal description for the Landowners' Property is attached hereto as *Exhibit "D"*, and is hereby incorporated by reference.

1.1 The County, through its Department of Public Works (Natural Resources Division), will perform the Project as described in *Exhibit "C"* under its Natural Resources Stewardship Program (NRSP) for the protection, improvement, and enhancement of water quality in Skagit County streams for the benefit of downstream saltwater shellfish habitat.

1.2 Landowners represent and warrant to the County that the Landowners are the legal owners of the property described in *Exhibit "D"* (the "Landowners' Property"), and further represent and warrant to the County that there are no outstanding rights which interfere with this Temporary Easement agreement. The Landowners also acknowledge that a change in property ownership will not change the encumbrance of the Landowners' Property created by the terms of this Temporary Easement, and the Landowners agree to inform any future owner of Landowners' Property of this Temporary Easement prior to sale or transfer of the Landowners' Property during the term of this Temporary Easement (as the terms of this Temporary Easement shall be binding on any subsequent owner[s] of the Landowners' Property for the duration of this Temporary Easement). The Landowners agree to notify the County, within thirty (30) days of transfer, of changes in ownership during the term of this Temporary Easement.

1.3 Landowners agree to inform the County (and the County's agents, employees, and contractors) of all known safety hazards on Landowners' Property prior to the commencement of the activities described in *Exhibit "C"*.

1.4 Except as provided to the contrary by the terms of this Temporary Easement, the Landowners retain the right to control trespass on Landowners Property, and Landowners shall retain all responsibility for taxes, assessments, and for any claims for damages to Landowners' Property.

1.5 Landowners recognize and agree that participation in the County's Natural Resource Stewardship Program does not eliminate or abrogate any jurisdictional authority, code requirements, or obligations required by any government entity including Skagit County.

2. Use of Easement. The County, County's employees, agents, and contractors shall have the right, with a forty-eight (48) hour notice, (or with such other notice as may be otherwise mutually agreed in writing by and between the parties), and during daytime hours, Monday through Saturday (unless otherwise arranged between the parties), to enter upon the Landowners' Property within the area of the Temporary Easement (as described and depicted in *Exhibit "A"* and *Exhibit "B"*), for the purpose of constructing and implementing the Project (described at *Exhibit "C"*) within the area of the Temporary Easement. Landowner shall not have the right to exclude the County, County's employees, agents, and/or contractors from the area of the Temporary Easement.

2.1 Project Components. This temporary easement includes the following components, as described in *Exhibit "C"*: (1) initial site work, (2) monitoring and maintenance, and (3) project preservation.

2.1.1 Initial Site Work. The initial site work includes site preparation, removal of invasive vegetation and installation of native riparian planting as described in *Exhibit "C"*. Initial site work will be conducted within one (1) year of mutual execution of this agreement.

2.1.2 Monitoring and Maintenance. A Restoration and Maintenance Plan (Plan) has been developed for the Project and is included as *Exhibit "C"*. In accordance with the

Plan, Skagit County shall provide maintenance of vegetation for three (3) years after planting. The Landowners shall be responsible for plant preservation, not to include active maintenance, following this three (3) year period.

2.1.3 **Project Preservation.** Landowners agree to preserve the Project in a substantially similar condition as exists at the time of Project completion and agrees to refrain from cutting, damaging, or otherwise harming any of the vegetation planted as part of the Project or in any way intentionally compromising the integrity of the Project for a period of ten (10) years from the date of mutual execution of this Temporary Easement agreement. Except as provided in Section 2.1.2, the Landowners shall be responsible for all riparian restoration preservation required as part of the Project. Landowners may be required to reimburse the County for Project costs funded by the County in the event that the Landowners do not preserve the Project in accordance with the terms of this Temporary Easement.

2.2 The Landowners acknowledge that Landowners are voluntarily participating in the County's NRSP for riparian restoration (as described in Exhibit "C") that is the subject of this Temporary Easement and is permitting the Landowners' Property to be used for such purposes pursuant to the terms of this Temporary Easement. The Landowners agree that the Project, when completed, will not now or in the future result in damages to the Landowners' Property, and that the County is not liable for any impacts to Landowners' Property resulting from the Project. The terms of this Section 2.2 shall survive the termination or expiration of this Temporary Easement.

2.3 The County agrees to be responsible for any damage arising from negligent acts of its employees, agents, or representatives on Landowner's Property in exercise of County's rights herein granted by this Temporary Easement (including for the workplace safety of the County's employees, agents, or representatives while performing Project work on the Landowners' Property). The County assumes no liability for any alleged damage to Landowners' Property resulting from this Temporary Easement, or from any source other than as may be expressly set forth herein.

3. Termination of Temporary Easement. The Project shall be considered complete following the completion of the activities described in Exhibit "C", including project maintenance activities. This Temporary Easement shall otherwise expire by its own terms ten (10) years from the date of mutual execution.

4. Governing Law; Venue. This Temporary Easement shall be construed under the laws of the State of Washington. It is agreed by the parties that the venue for any legal action arising from or relating to the terms of this Temporary Easement shall be in Skagit County, State of Washington.

5. Entire Agreement. This Temporary Easement contains the entire agreement between the parties hereto and incorporates and supersedes all prior negotiations or agreements. This Temporary Easement may not be modified or supplemented in any manner or form whatsoever, either by course of dealing or by parol or written evidence of prior agreements and negotiations, except upon the subsequent written agreement of the parties. Waiver or breach of any term or condition of this Temporary Easement shall not be considered a waiver of any prior or subsequent breach.

GRANTORS:

Jennifer L. Strickland and Justin J. Braaten, a married couple.

By: Jennifer L. Strickland

DATED this 04 day of April, 2023.

By: Justin J. Braaten

DATED this 04 day of April, 2023.

EXHIBIT "A"
TEMPORARY EASEMENT AREA LEGAL DESCRIPTION

A temporary easement for the purpose of restoration and maintenance within parcel P80729 more particularly described as follows:

BEGINNING AT THE NORTHEASTERN CORNER OF SKAGIT COUNTY TAX PARCEL P80729;

THENCE SOUTHERLY ± 143.71 FEET ALONG THE WESTERN PROPERTY LINE;

THENCE NORTHWESTERY ± 49 FEET ALONG THE SOUTHWESTERN PROPERTY LINE;

THENCE NORTHEASTERLY ± 157 FEET, FOLLOWING THE HILL SLOPE, TO A POINT LOCATED ALONG THE NORTHERN PROPERTY LINE;

THENCE SOUTHEASTERLY ± 70 FEET ALONG THE NORTHERN PROPERTY LINE, RETURNING TO THE TRUE POINT OF BEGINNING.

SITUATE IN SKAGIT COUNTY, STATE OF WASHINGTON.

EXHIBIT "B"
GRAPHIC DEPICTION OF TEMPORARY EASEMENT AREA

This temporary easement includes the above-depicted shaded area required the Project.

Parcel Numbers: P80729
Address: 6961 Danya Place
Sedro Woolley, WA 98284
Situate in the County of Skagit, State of Washington

EXHIBIT "C"
RIPARIAN RESTORATION AND MAINTENANCE PLAN
SCOPE OF WORK

OVERVIEW

This privately owned restoration site (owned by the Landowners herein) is located along an unnamed tributary to Thomas Creek. The goal of this project is to remove a 0.20-acre monoculture of blackberries along the tributary and install native plants. Removal of invasive plant species in favor of a diverse mixture of native trees and shrubs will help to improve water quality on site for the protection, improvement, and enhancement of downstream saltwater shellfish habitat in Samish Bay. This project (herein "Project") will support the establishment of 175 native trees and shrubs over 0.20 acres to improve 175 linear feet of stream.

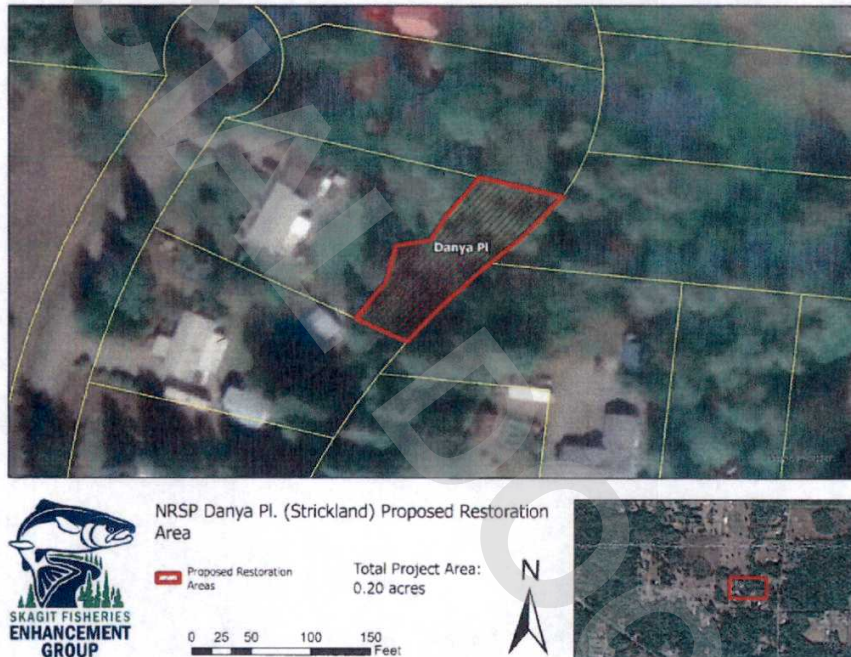

Figure 1. Planting Area

SITE PREPARATION

Invasive Species Control

Starting in the summer of 2023, the County and/or the County's contractor(s) will work with the Landowner to control invasive weeds on the site in preparation for planting. The primary weed of concern that has been identified at this site is Himalayan blackberry (Figure 2).

Himalayan Blackberry: Blackberry grows in a dense monoculture throughout the understory of the site. In 2023 the blackberry will be mowed where it occurs throughout the site. The blackberry will re-grow for approximately 6-8 weeks to about shin-height, then be sprayed 2% glyphosate herbicide with non-ionic surfactant. Areas within 25 feet of running water will be sprayed with the aquatic formula of glyphosate in accordance with product label requirements. This treatment will be repeated in 2024 to ensure complete control prior to planting. Invasive weed species that can impede establishment and growth of native plants will be controlled in a manner that is cost effective and consistent with accepted ecological restoration methods. Herbicide use will be minimized to the maximum extent practical. Herbicide is applied under the supervision of a licensed applicator, with a licensed operator on site at all times during work, and such operators are licensed to work in and around water and in a terrestrial environment. Herbicide will be applied in accordance with guidelines designated by the Environmental Protection Agency on appropriate herbicides for fish bearing streams. No herbicide application is conducted when rain is predicted within 6-hours or winds speeds are greater than 10 mph.

the following herbicides are proposed at this site:

1. **Roundup Custom:**

<https://www.sdslibrary.monsanto.com/MSDS%20Datasheet/8121f99d-ad3b-49ac-875d-228b0ccdb7f3/RoundupCustom-AquaticTerrestrialUse.O15.pdf>

2. **Cornerstone Plus:** <http://www.cdms.net/ldat/mp9LA003.pdf>

Landowners will be notified by phone at least 48 hours prior to any herbicide treatment.

I acknowledge that I have been informed of and agree to use of herbicide at my property.

JB/hs (Landowners' initials)

Washington State Class A weeds are those species where control is required when these species are found. If encountered on the Project, Class A weeds will be identified to the Landowners in writing and the Landowners will be provided information on state control requirements and recommended methods. If approved by the Landowners, these weeds will be controlled as part of the Project using recommended methods. Class A weeds will be reported to the appropriate Cooperative Weed Management Area (CWMA).

Washington State Class B weeds are those species where control is recommended by the state and/or recommended/required by the county noxious weed board. If encountered on the Project, Class B weeds will be identified to the Landowners in writing and the Landowners will be provided information on state control requirements and recommended methods. Control of Class B weeds will not be conducted as part of this restoration Project.

The following Class C weeds are considered to be a threat to successful riparian restoration if they occur within restoration sites:

- Himalayan blackberry (*Rubus armeniacus*)
- Evergreen blackberry (*Rubus laciniatus*)
- Morning glory (*Convolvulus arvensis*)
- English ivy (*Hedera spp.*)
- Old man's beard/Travelers joy (*Clematis vitalba*)

- Reed canary grass (*Phalaris arundinacea*)

The above class C weeds will be controlled as part of restoration site preparation and maintenance when they occur within the restoration area. The above weeds will be controlled within the restoration area for the duration of the Maintenance Period.

Figure 2. A dense monoculture of blackberry growing throughout the understory at the Project site.

RIPARIAN RESTORATION

Riparian Planting

Following two years of site preparation, Skagit Fisheries Enhancement Group (SFEG) will begin planting in the winter of 2024/2025. WCC crews and/or EarthCorps crews will plant 175 native trees and shrubs over 0.20 acres of understory riparian habitat. Plants will be spaced approximately 8 feet apart throughout the planting area. Due to the steepness and relative shade of the hillside creating an inhospitable environment for voles, no plant protectors or stakes will be installed. SFEG will flag each plant to aid monitoring efforts. At least 60% of the plants will be conifers to support the establishment of long-lived tree species on the site.

Table 1. Typical plant species

Common Name	Scientific Name	Common Name	Scientific Name
<i>Thuja plicata</i>	Western Red Cedar	<i>Lonicera involucrate</i>	Twinberry
<i>Picea sitchensis</i>	Sitka Spruce	<i>Cornus sericea</i>	Red-osier Dogwood
<i>Pseudotsuga menziesii</i>	Douglas Fir	<i>Sambucus racemose</i>	Red Elderberry
<i>Tsuga heterophylla</i>	Western Hemlock	<i>Oemleria cerasiformis</i>	Osoberry/Indian Plum
<i>Abies grandis</i>	Grand Fir		

MAINTENANCE

After planting, maintenance will include manual removal of blackberry where feasible. The goal is to be able to maintain the site without using herbicide, this goal is dependent on the weed load and site-

specific conditions. If dense re-growth occurs, a combination of spot spraying and manual control may be used. Crews will continue to visit the site at a minimum of once per year to maintain the planting area for three growing seasons after the planting phase of the Project is complete.

MONITORING

Revegetation success will be monitored following standard monitoring protocol. Planting sites are monitored for up-to the life of this Temporary Easement.

Plant mortality, health, and herbivory or other damage is recorded to derive an overall site condition each year. Survival percentage (compared to the original number of plants installed) and tree-stocking (total trees per acre including both planted and naturally recruited trees) are evaluated in each year that monitoring occurs. These data are used to determine the need for revegetation; at least 80% of the plants originally installed are live at the end of the Project.

Timeline

EXHIBIT "D"
LEGAL DESCRIPTION OF GRANTORS' PROPERTY

Lot 11, "Plat of Thomas Creek" as per plat recorded in Volume 12 of Plats, pages 14 and 15, records of Skagit County, Washington.

Situate in the County of Skagit, State of Washington.
