AMENDMENT of HIGH SODIUM LEVEL NOTICE AVERY LANE DIVISION II WATER SYSTEM (ID #081962)

The purpose of this filing is to amend and supersede a previous high sodium level warning documented on page 3, of filing 200512090129, entered into record on 12/9/2005 in Skagit County.

In 2023, water treatment for water system ID #081962, was upgraded and no longer involved the use of a water softener for treatment.

On July 10, 2024, a water sample was submitted to Edge Analytical, located in Burlington, WA, for testing sodium levels following water treatment. The tests results from that sample indicated sodium levels to be 19.4 mg/L versus 191 mg/L as reported in 2005. The testing results are attached to this filing in support of this document.

The Washington State Board of Health list sodium as a primary contaminant, but a maximum contaminant level has not yet been established.

The EPA has not established a maximum contamination level (MCL) for Sodium in drinking water. They have however, published an advisory level of 20 mg/L for those individuals that may have high blood pressure concerns.

Sample Comment:

DOH#	ANALYTES	RESULTS	UNITS	SRL	Trigger	MCL	Analyst	METHOD	Lab	Analyzed	COMMENT
14	State Regulated SODIUM	19.4	mg/L	0.5			bj	200.7	a	07/12/24	

NOTES:

SRL (State Reporting Level): Indicates the minimum reporting level required by the Washington Department of Health (DOH).
 MCL (Maximum Contaminant Level) maximum permissible level of a contaminant in water established by EPA; Federal Action Levels are 0.015 mg/L for Lead and 1.3 mg/L for Copper. Sodium has a recommended limit of 20 mg/L. A blank MCL value indicates a level is not currently established.
 Trigger Level: DOH Drinking Water Response level. Systems with compounds detected in excess of this level are required to take additional samples. Contact your regional DOH office.
 ND (Not Detected): Indicates that the parameter was not detected above the Specified Reporting Limit (SRL).
 An * in front of the parameter name indicates it is not NELAP accredited but it is accredited through WSDOH or USEPA Region 10.
 These test results meet all the requirements of NELAC, unless otherwise stated in writing, and relate only to these samples.
 If you have any questions concerning this report contact Lawrence J Henderson, PhD, Director of Laboratories, Vice President, at the toll-free phone number above.
