This map was created from available public records and existing map sources, not from field surveys. Map features from all sources have been adjusted to achieve a "best fit" registration to the Ownership Parcels Map. While great care was taken in this process, maps from different sources rarely agree as to the precise location of geographic features. The relative positioning of map features to one another results from combining different map sources without field "ground truthing."

Data Source Information:

County Boundary, Incorporated Areas, Hydrology and Road centerlines are maintained by Skagit County GIS. Precipitation data was provided by the WSDOT dataset titled "Isopluvial Boundaries for Western Washington (Rainfall Intensity Data)," and depicts precipitation intensity for 24-hour events with a return period of 50 years. Precipitation data was originally published by the Oregon Climate Service at Oregon State University.
