TS - 1
Tsunami Inundation Areas in Skagit County

Tsunami propagation and inundation are computed with the Method of Splitting Tsunami (MOST) model. The MOST model uses the shallow-water wave approximation to compute tsunami wave amplitudes and flow velocities. The MOST model is discussed in detail in Titov and Gonzalez (1997). More info from: http://www.dnr.wa.gov/geology/

* Predicted inundation is based on elevation of adjacent model area on Fir Island and extended at the same elevation using the WA DNR DEM.
