

Skagit County Department of Emergency Management

Training and Exercise Calendar

June 2018

Skagit County Highlighted Training:

MGT-448 All Hazards Planning for Animal, Agriculture & Food Related Disasters, July 10

This course will provide the background information needed to lead a multi-agency team of emergency planners in the development of an ESF annex for food and/or animal related disasters to supplement their community's existing EOP. See page 14 for details.

MGT-347: ICS Forms Review, July 12

You've taken the ICS courses but can't remember a 201 from a 230? This 4 hour workshop provides information to emergency response supervisors and mid-to upper-level managers about the Incident Command System (ICS) forms used in the development of an Incident Action Plan (IAP). **This course will fill up quickly. Early registration is recommended.** See page 15 for details.

(New items are highlighted in yellow)

Message from Washington State EMD:

We are limited on the number of courses we instruct and on the number of students that we can accommodate. For many courses, we maintain a waiting list. A no-show without notification means that a classroom seat goes vacant and that another potential student misses the opportunity to participate in our course. Additionally, many hours of coordination are put into each course we produce. This includes time and costs required to coordinate instructors, curriculum, course materials, your registration, and attendance.

This is your notification that should you register, but not show to one of our courses in the future, we will bar you from attending all courses conducted or hosted by Washington EMD for one year. Some circumstances would certainly exempt a student from this action. We would consider exceptions on a case-by-case basis (automobile accident or family emergency). An email or telephone notification to the Course Manager is more than satisfactory

Some of the courses offered in this document are delivered by the Center for Domestic Preparedness, National Disaster Preparedness Training Center at the University of Hawaii, Texas A & M University Engineering Extension Service (TEEX) and other educational institutions and technical training centers.

This training is funded by DHS and FEMA and is delivered free of charge to the students. However, instructors travel to Skagit County from Hawaii, Texas, New Mexico, and Alabama. For some courses, a great deal of course materials and equipment are shipped to the training venue.

Because of the travel, lodging, ground transportation, and shipping expenses involved, there is a minimum student registration count that must be met at least 30 days before the course date. This requirement ensures that federal training funds are properly expended on full classes. Not meeting the minimum student count before the deadline results in course cancellation.

Washington EMD's Training Link for Course Information and Registration

The new system will be located at <https://www.mil.wa.gov/training-and-exercise>. Just click on the link under the header titled, "In State Training Calendar". That is where you will find our current list of upcoming courses and a link to view course details and registration information. The new system will allow you to register for an account but will not require you to do so. Registering for an account saves your registration information in the system and saves time when you register for future events. Registration for an account also saves any completion certificates you send in with your application to your profile. The new system will do marketing, registration, evaluations, and certificate issue.

Each user will still have their existing TRAIN-National Profile. Your account will remain active and your username and password are unchanged. Your TRAIN-National Profile will still have all of your certificates and transcript of completed courses. You may access the TRAIN-National profile by clicking on the following link: <https://www.train.org/main/home>, and logging in using the same credentials as before. Click on 'YOUR LEARNING' tab to access your certificates and transcripts.

Go to https://reg.abcsignup.com/reg/reg_login.aspx and have a look.

You may also find training at the below listed resources:

- Develop an Incident Action Plan for a simulated incident.

L0727 Executive Orders 11988 and 11990: Floodplain Management and Wetlands Protection

June 26 – 28
Lynnwood

Course Description:

This course describes the Executive Orders (EOs) 11988 and 11990 on Floodplain Management and Wetlands Protection that require Federal agencies to avoid actions in or adversely affecting floodplains and wetlands unless there is no practicable alternative. EO 11988 establishes an eight-step process that agencies should carry out as part of their decision-making on projects that have the potential to impact floodplains.

Course Objectives:

Upon completion of this course, participants should be able to understand the principles of EOs 11988 and 11990 and apply the requirements of 44 CFR Part 9 to FEMA programs and activities. Compliance with EOs 11988 and 11990 is a requirement of all FEMA-funded programs and activities.

Target Audience:

This course targets Environmental and Historic Preservation (EHP) Floodplain Management Specialists, Task Force/Crew Leaders, and Advisors; FEMA Public Assistance Officers; Coordinators and Project Officers; Mitigation Project Officers; and Individual Assistance Direct Housing Officers and

Prerequisites:

Required prerequisites include Independent Study (IS) course [IS-253.a](#) and completion of FEMA’s Mapping Tutorial - https://www.fema.gov/media/fhm/firm/ot_firm.htm.

Recommended prerequisites include working knowledge of FEMA’s programs.

To Apply:

FEMA Form 119-25-1 Application:

<http://training.fema.gov/Apply/119-25-1.pdf>

Applicants will need to put their Student Identification (SID) in place of their social security number. If you do not yet have a SID, just follow these three simple steps to obtain one:

Step 1: To register, go to: <https://cdp.dhs.gov/femasid/>

Step 2: Click on the “Register for a FEMA SID” button in the middle of the screen.

Step 3: Follow the instructions and provide the necessary information to create your account.

Enrollment confirmations will be sent approximately 30-days prior to the course via email.

Course Coordinator:

| | | | | |
|--|---|--------------|---|---|

| Preparedness & Planning | | | | |
| G0489 Management of Spontaneous Volunteers | August 4 Renton Technical Collage | 8am-5pm | <p>This course aims to introduce the keys to success in managing large numbers of spontaneous volunteers in disasters. Its underlying assumption is that much of the volunteer help is indeed needed, and that with basic emergency management coordination skills, the volunteer resources can often be put to effective use, making a positive difference in the affected community. The course will discuss the benefits spontaneous volunteers can bring to relief efforts and the challenges they may bring if not coordinated effectively. In addition, the course will examine planning considerations regarding spontaneous volunteers. Special emphasis is also placed on how to make full use of a Volunteer Reception Center the backbone of any well-organized spontaneous volunteer management program.</p> | <p><u>Prerequisites:</u></p> <p>All course participants should be familiar with their own state and local government Emergency Operations Plan Annex, if one exists, on the use of spontaneous volunteers and volunteers affiliated with relief organizations.</p> <p>Recommended: Individuals should have a working knowledge of the Incident Command and National Incident Management Systems (IS0100, Introduction to the Incident Command System, ICS 100; IS0200.b, Incident Command System for Single Resources and Initial Action Incidents; IS0700.a, National Incident Management System, An Introduction; and IS0800.b, National Response Framework, An Introduction).</p> <p>Target Audience:</p> <p>This course has been developed for Emergency Managers, community, faith-based, and voluntary organizations responsible for the management of spontaneous volunteers.</p> <p>Apply at the EMD Training Calendar:</p> <p>https://reg.abcsignup.com/reg/event_page.aspx?ek=0038-0021-332735ffaeae4fb4bb6745c757dd51fe</p> |

| AWR-148 Crisis Management for School-Based Incidents – Partnering Rural Law Enforcement, First Responders, and Local School Systems | October 23, 2018 Skagit County | 8am – 5 pm | The purpose of the <i>Crisis Management for School-Based Incidents – Partnering Rural Law Enforcement and the Local School Systems</i> course is to educate rural law enforcement personnel as well as school administrators and personnel on the elements that must be in place to effectively respond to an emergency at a school building or an entire school system. With the influx of shootings in and around schools, the training offered in this course is extremely critical. In particular, schools, law enforcement personnel and other emergency responders in rural communities are often times limited in resources, so it is very important for all parties to plan, prepare, and communicate. Rural law enforcement officials will receive information and training tools they can provide directly to their local school systems. By doing so, they will be better prepared to actively work with Superintendents, Principals, School Resource Officers, and others within their school systems, thereby making all school systems and school buildings safer and more secure. | Registration information coming soon! |

Distance Learning

The Emergency Management Institute (EMI) offers over 200 Independent Study (IS) courses designed for emergency management and whole community partners. Non-governmental, private, faith-based, business, and non-profit organizations are appropriate participants. Many of these courses are prerequisites for subsequent classroom training. All are free-of-charge. To get a complete listing of courses, click on Course List link below:

<http://training.fema.gov/is/crslist.aspx>

National Incident Management System Training Program (NIMS)

The National Incident Management System (NIMS) Training Program recommends certain coursework for individuals who may be assigned field responder or Emergency Operations Center (EOC) roles.

Levels of suggested NIMS training for EOC and field responders are based on five levels of incident complexity, Types 1 – 5.

A Type 1 incident is the most complex. Some Type 1 descriptive incident characteristics are bulleted below:

- Requires national resources for safe and effective management and operation.
- All ICS command and general staff positions are filled.
- Operations personnel often exceed 500 per operational period and total personnel will usually exceed 1,000.
- Branches need to be established.
- A written Incident Action Plan (IAP) is required for each operational period.
- The agency administrator will have briefings, and ensure that the complexity analysis and delegation of authority are updated.
- Use of resource advisors at the incident base is recommended.
- There is a high impact on the local jurisdiction, requiring additional staff for office administrative and support functions.

A major earthquake in Skagit County is a Type 1 incident.

NIMS training includes the following coursework for EOC staff activated in a Type 1 complexity incident:

IS-100: Introduction to the Incident Command System
IS-700: National Incident Management System
IS-701: NIMS Multiagency Coordination System (MACS)
IS-706: NIMS Intrastate Mutual Aid – An Introduction
IS-800: National Response Framework, An introduction

G-191: Incident Command System/Emergency Operations Center Interface (classroom offering only)
G-775: Emergency Operations Center (EOC) Management and Operations (classroom or IS-775 – EMI online)

The NIMS Training Program recommends field responders mobilized against a Type 1 incident have similar training:

- IS-100: Introduction to the Incident Command System
- IS-200: Basic Incident Command System
- ICS-300: Intermediate ICS
- ICS-400: Advanced ICS
- IS-700: National Incident Management System
- IS-800: National Response Framework, An introduction

The coursework for Type 2, 3, 4 and 5 incident complexity environments diminishes as the progression from Type 1 to Type 5 (least complex) continues.

In general, most everyone should have the baseline NIMS training (IS-100 and IS-700) including schools, hospitals, businesses, special purpose districts and various members of the whole community. An interface with the Incident Command System may come at any time given our probability of occurrence of a natural or technological disaster or an act of terrorism. This training will clarify mutual expectations should fire, police, or EMS resources arrive in your parking lot.

These are NIMS Training Program recommendations. Each jurisdiction must decide what level of training their respective first responders and EOC staff are required to complete. The Snohomish County Emergency Management Training Program Manager is available to provide advice on NIMS training for various city and tribal nation personnel.

All courses beginning with “IS” are available on line at FEMA’s Independent Study site.

CONFERENCES AND WORKSHOPS

| Title | Date | Information | Registration |
|---|--|--|---|
| 2018 Annual State Training & Exercise Planning Workshop (TPEW) | June 5, 2018 8 am – 4:30 pm Little Creek Casino – Meeting & Conference Rooms | An annual TEPW provides the opportunity to review the jurisdiction's or agency's strategy and develop or update its Multi-Year Training and Exercise Plan. There is a focus on coordination of all training and exercise activities occurring throughout the jurisdiction or agency, including activities sponsored by Federal agencies, States, local governments, and tribal governments. Jurisdictions or agencies must ensure that their training and exercise schedules are coordinated to prevent duplication of efforts, ensure resources are not overextended during training or exercises, and maximize the efficacy of training and exercise appropriations. Moreover, schedule collaboration can present opportunities for jurisdictions and agencies to fulfill multiple grant requirements with a single exercise or training course. | This event is for county, city, and tribal emergency managers; state agency liaisons; exercise coordinators; training coordinators; regional coordinators; and emergency planners. Workshop Contact Travis Linares-Hengen SEOC Staff Training and Exercise Program Manager WA Emergency Management Division Phone: 253-512-7049 Email: travis.linares-hengen@mil.wa.gov |
| 2018 LEPC/Tribal Conference | June 6 - 8 Little Creek Casino – Meeting & Conference Rooms | The 2018 Conference will include: <ul style="list-style-type: none"> • Multiple HazMat Incident Presentations and Panels • Exercise Tool Workshop | The LEPC/Tribal Conference is endorsed and planned through a collaborative effort of the Washington State Emergency Response Commission |
