Intended Outcomes

1. Understand how the Skagit landscape has formed over time and how it continues to affect our natural and built environments, including flood risk and other natural hazards
2. Understand what has made the Skagit a productive river for fish species and the restoration and protection challenge
3. Understand wildlife and wildlife needs in the Skagit

¹ Each presentation will be 20 minutes followed by 5 minutes of Q&A. There will be opportunity for additional Q&A after all presentations are completed.
