Charter Language - Decision Making

Decisions will be based on reaching consensus, defined as “general agreement or majority of opinion” of the attending membership. If an issue has significant disagreement or dissent, Trust members will continue to deliberate until members feel confident in the decision. Voting by majority will be used as a last resort in order to keep momentum going.

How does Criminal Justice Intersect with Health Planning?

Concerns:

- High medical and BH needs
- HIPPA, PRIA & Litigation
- Continuity of Care: Jail treatment is part of a movie, not a photograph
- Partnerships (Programming/Health Education)
- In-House care delivery

Trends & factors shaping EMS:

Payer Mix Changes

Most aspects of the Affordable Care Act were implemented in January 2014, and we have since been noticing some changes and new trends in our clients' payer mix. We are seeing an overall increase in Medicaid transports, as well as an increase in Medicaid fee schedule write-offs as a result. We are also noticing an increase in Medicare, a decrease in commercial insurance, and a decrease in private pay accounts. Some of our clients have realized only a slight decrease in overall revenue.

Where EMS is going?

We must evolve into true “Paramedics”

Para = an extension of
Medic = physician

The paramedic serves as an "extension of" a physician. We serve as her eyes, ears, and hands in the ~~prehospital setting~~ **physician's absence**. The physician guides us with a set of instructions or "protocols" which help us know what she wants done in certain situations. The paramedic can also contact the doctor by phone or radio **or video conferencing** for ~~instructions for particularly difficult scenarios~~ **consultation regarding the best course of treatment and/or transport options based on the individual patient's needs.**
