**RE: Phase 1 Environmental Site Assessment**  
Truck City  
3228 Old Highway 99 South  
Mount Vernon, WA 98273  
Property ID# P29546 (main), P119262, P119263, P119265, P119267

MTC Project No.: **13B093**

Dear Ms. Buckely,

Materials Testing and Consulting, Inc. is pleased to present this Phase 1 Environmental Site Assessment for the above referenced project located at 3228 Old Highway 99 South in Mount Vernon, Washington, including parcel numbers P29546, P119262, P119263, P119265, and P119267 listed by the Skagit County Assessor. The results of our assessment, opinions regarding site environmental conditions, and recommendations are found in the following report. This assessment was conducted in compliance with the standards set forth in ASTM Standard E 1527-05.

We welcome the opportunity to be of additional service to you. Please feel free to contact us if you have any questions or concerns.

Respectfully Submitted,  
**MATERIALS TESTING & CONSULTING, INC.**

A handwritten signature in black ink, appearing to read 'Leland Rupp', is written over a light blue horizontal line.

# 1 Executive Summary

Materials Testing and Consulting, Inc. (MTC), has performed a Phase 1 Environmental Site Assessment at the subject property (3228 Old Highway 99 South, Mount Vernon, Washington – Parcels P29546 (main), P119262, P119263, P119265, and P119267). The main parcel is currently being utilized for a truck-stop and restaurant-café. The secondary parcels are currently undeveloped. This assessment was executed in order to identify recognized environmental conditions, conducted in accordance with ASTM E 1527-05, and includes the following elements as defined in this recognized standard: a site reconnaissance, interviews with relevant personnel, historical records review, a radius search, consultation of physical setting sources such as aerial photographs, topographic maps, and geologic maps, and review of available government records. In addition, MTC performed a request with the Washington Department of Ecology for subject property environmental records, and reviewed documents including prior site events, site assessments, and remediation reports, with results summarized herein. The environmental professional(s) that conducted this assessment are Licensed in Washington State as Geologists, Engineering Geologists, or Professional Engineers as specified in 312.10 of 40 CFR 312.

Environmentally regulated sites in the vicinity of the subject property identified by Radius Search performed under subcontract by Environmental Data Research (EDR) and review of the Washington State Department of Ecology Facility/Site Database are interpreted to be of a distance and elevation from the site which does not present an obvious risk to site environmental conditions from known past or present uses or activities, with possible exception of the nearby *Hallmark Refining Corp*, as discussed in Section 8 of this report. The position of the refinery up gradient of the site and its generation of hazardous waste streams suggests a recognized environmental condition for the site.

The main parcel of the subject property is in an area of light commercial and storage use presently and historically within the last approximately 25 to 35 years. Prior to the 1950s, the site vicinity was used generally as farmland. The main parcel of the subject property is developed with a paved-surface parking and storage lot occupying the majority of the exterior. Pavement in the eastern portion of the parcel is in generally poor condition and indistinguishable from gravel. The Truck City Truck Stop was constructed by 1953, which was a Standard Oil fuel stop. A single story office building constructed in 1957 is located on the southern edge of main parcel. The Truck Stop building was burned in 1976. A retail store, restaurant, gas station,

truck washing building and a large storage building were constructed in 1978. MTC does not consider site use prior to 1953 to pose an obvious risk of a recognized environmental condition.

The site is currently operated as a truck-stop and restaurant-café. Visual site reconnaissance identified many trucks temporarily stored on-site and an unused, decommissioned above-ground petroleum storage tank suggesting localized surface petroleum spills or leaks may have occurred over a long period of site use. Historical documentation indicates that leaking of previous underground storage tanks did occur within the western part of the site and subsequent Interim Action Cleanup was conducted. A 2006 Phase II ESA was conducted in the western area and extended to a newer tank farm located east of the truck stop store. It was not indicated that the site east of the newer tank farm was investigated during the Phase II ESA. The Phase II ESA stated results of soil and groundwater sampling up to 8 feet depth did not encounter petroleum impact. The Phase II ESA indicated presence of two oil tanks on site but whose locations were not verified. During MTC's interview with the site owner/manager, it was indicated that a fuel spill had occurred after the Phase II ESA was conducted. The interview also indicated the presence of one abandoned oil tank beneath the floor of the truck stop store. A 2012 Skagit County Public Health Source Control site visit was conducted around the fueling islands and storm drains, in which no surficial environmental concerns were noted.

MTC recommends an exploratory environmental sampling program be conducted on the site exterior with the goal of assessing the general presence and extent of potential petroleum contamination from past and current use. MTC recommends that we be contacted at the client's discretion to discuss additional environmental investigation services. MTC anticipates a series of explorations distributed throughout the site for soil sampling and laboratory analysis may be sufficient initially to address the potential level and extent of existing concern, based on our understanding of site conditions at this time. Depending on the extent of scope and results of investigation, this may provide a reasonable level of understanding as to the presence or absence of petroleum contamination existing on the subject property.

## 2 Introduction

### 2.1 Purpose and Scope

The purpose of this report is to conduct all appropriate inquiry into recognized environmental conditions of the subject property according to accepted standards identified in ASTM E 1527-05 and to qualify the user of this report to meet one of the requirements needed for the innocent landowner defense provided under CERCLA. Per Section 3.3.31 of the ASTM standard a “recognized environmental condition” is defined as the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into the structures on the property or into the ground, groundwater, or surface water of the property. A “historical recognized environmental condition” is defined as a past environmental condition which may not be considered a current “recognized environmental condition” upon consideration of past site activities and current impacts. This report does not include *de minimus* conditions that generally do not present a material risk of harm to public health or the environment.

The scope of services provided in this environmental site assessment consists of the following:

- **Site reconnaissance** including a visual inspection of the property and any structures found on the property, limited to exterior and interior areas that are readily accessible. The site reconnaissance also includes visual and physical observations of adjoining properties. Information concerning current and past uses of the property and adjoining property was collected as relevant to recognized environmental conditions.
- **Records review** of federal, state and local sources that contain information about hazardous substances and underground storage tanks. This also includes a title history review.
- **Interviews** of the owner, key site manager, and applicable occupants of the property as well as relevant local government officials.

- **Map and aerial photo review** of the property and adjoining properties to characterize the geologic, hydrogeologic, and topographic conditions of the subject property in addition to its present and past uses.
- **Report preparation** that presents the environmental conditions encountered, opinions on site environmental conditions, and conclusions and recommendations for further investigation.

Users of this report are cautioned that local, state and federal regulations may require additional obligations outside the scope of this report.

## ***2.2 Special Terms and Conditions***

This assessment was executed in accordance with ASTM E 1527-05, “Standard Practice for Environmental Site Assessments: Phase 1 Environmental Site Assessment Process”. A Phase 1 ESA is site and time specific. It is applicable only to the parcel(s) identified herein for the given timing of the assessment. The findings and conclusions about the environmental conditions of the project site represent probabilities, not scientific certainties, based on the professional judgment of the environmental inspector. Without actual subsurface or surface soil and water sampling, which is outside the scope of this assessment, MTC presents the most likely environmental conditions of the property based on the available “eyes-only” and “ears-only” data. Future investigations may identify environmental conditions not recognized by this report if new information, technology, analytical techniques, or other factors become available. Our investigation reduces, but does not eliminate, uncertainty regarding recognized environmental conditions. The appropriate inquiry used in conducting this assessment was not exhaustive. However, a reasonable balance was achieved between the cost/time demands of information gathering and the need to reduce the uncertainty of environmental conditions.

## ***2.3 Certification and Statement of Limiting Conditions***

The text contained in Section 2.3 “Certification and Statement of Limiting Conditions” is credited to the Environmental Assessment Association.

***Certification:*** The Environmental Inspector certifies to the buyer, seller and/or lender in a transaction as named in the inspection report “Principal Parties”; and the Inspector and the Principal Parties agree that:

1. The Environmental Inspector has no present or contemplated future (a) partnership with Principal Parties nor (b) an interest in the property inspected which could adversely affect the Inspector's ability to perform an objective inspection; and neither the employment of the inspector to conduct the inspection, nor the compensation for it, is contingent on the results of the inspection.
2. The Environmental Inspector has no personal interest in or bias with respect to the subject matter of the inspection report or any parties who may be part of a financial transaction involving the property. The conclusions and recommendations of the report are not based in whole or in part upon the race, color, creed, sex or national origin of any of the Principal Parties.
3. The Environmental Inspector has personally inspected the property, both inside and out and has made visual inspection of the adjacent property, to the extent possible by readily available access. The inspection does not include the removal of any soil, water or air samples, the moving of furniture or fixtures, or any type of inspection that would require extraordinary effort to access.
4. All contingent and limiting conditions are contained herein (imposed by the terms of the inspection assignment or by the undersigned affecting the conclusions and recommendations contained in the report).
5. This Environmental Inspection report has been made in conformity with and is subject to the requirements of the Code of Professional Ethics of the Environmental Assessment Association.
6. All opinions, conclusions and recommendations concerning the inspected property that are set forth in the inspection report were prepared by the Environmental Inspector whose signature appears on the report. No change of any item in the report shall be made by anyone other than the Inspector, and the Inspector shall have no responsibility for any such unauthorized changes.

***Contingent and Limiting Conditions:*** The certification of the Environmental Inspector appearing in the environmental inspection report is subject to the following conditions and to such other specific and limiting conditions as are set forth by the Inspector in the report.

1. The Inspector assumes no responsibility for matters of a legal nature affecting the property inspected or the title thereto. The property is inspected assuming responsible ownership.
2. Any sketch appearing in or attached to the inspection report, or any statement of dimensions, capacities, quantities or distances, are approximate and are included to assist the reader in visualizing the property. The inspector has made no survey of the property.
3. The Inspector is not required to give testimony or appear in court because of having made the inspection with reference to the property in question, unless arrangements have been previously made.
4. This report is not intended to have any direct effect on the value of the property inspected but simply to provide a visual Environmental Assessment solely for the benefit of the Principal Parties.
5. The Inspector assumes that there are no hidden, unapparent, or latent conditions or defects in or of the property, subsoil, or structures, other than those noted on the inspection report or any addendum to the report that the Inspector has included. The Inspector assumes no responsibility for such conditions or for the inspection, engineering or repair which might be required to discover or correct such factors.
6. Information, estimates and opinions furnished to the Inspector, and contained in the report were obtained from sources considered reliable and believed to be true and correct. However, the Inspector has made no independent investigation as to such matters and undertakes no responsibility for the accuracy of such items.
7. The Inspector makes the Inspection and Inspection Report solely for the benefit and personal use of the Principal Parties. Disclosure of the contents of the Inspection Report is governed by the Bylaws and Regulations of the Environmental Assessment Association. No disclosure may be made of the Inspection Report without the prior written consent of the Inspector and the Inspector undertakes no responsibility for harm or damages to any party other than the Principal Parties.
8. Neither the Inspection Report, any part thereof, nor any copy of the same (including conclusions or recommendations, the identity of the Inspector, professional designation,

reference to any professional organization, or the firm with which the Inspector is connected), shall be used for any purposes by anyone but the Principal Parties. The report shall not be conveyed by anyone to the public through advertising, public relations, news, sales, or other media, without the prior written consent and approval of the Inspector.

## ***2.4 Qualifications of the Environmental Professionals Conducting this report***

In order to provide qualifications for our Environmental Professionals as set forth in 40 CFR 312.21(d):

“We declare that, to the best of our knowledge and belief, we meet the definition of *Environmental Professional* as defined in 312.10 of 40 CFR 312”

And

“We have the specified qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.”

The environmental professional conducting this report is either: Licensed by the State of Washington as a Geologist; or conducting limited portions of the following Phase 1 Environmental Site Assessment process under the direct supervision of a Geologist Licensed by the State of Washington, as per section 312.10 (1)(i) and (5) of 40 CFR 312.

## 3 Site Description

### 3.1 Location and Legal Description

The subject property is located at 3228 Old Highway 99 South in Mount Vernon, Washington (See Location Map, Section 10.1), and is comprised of the western two thirds of a parcel and four adjoining parcels on file with the Skagit County Assessor: Property ID numbers P29546 (main – western two thirds), P119262 (western spur), P119263 (south-western spur), P119265 (southern spur), P119267 (south-eastern spur).

The legal description of the parcel is as follows:

**For APN/Property ID(s): P29546 (8.01 ac)**

(DK 3) THE SOUTH 20 RODS OF THE NORTH 30 RODS OF THE SW1/4 NW1/4 OF SEC 32, TWP 34, RNG 4; EXCEPT THE NORTH 63 FEET OF THE WEST 107 FEET THEREOF; EXCEPT EXISTING STATE HIGHWAY RIGHT OF WAY AND EXCEPT THAT PORTION THEREOF AS CONVEYED BY PERRY G GARBERG TO THE STATE OF WASHINGTON BY DEED RECORDED UNDER AF#485835, AND LYING EASTERLY OF A LINE DRAWN PARALLEL WITH AND 100 FEET WESTERLY, WHEN MEASURED AT RIGHT ANGLES, FROM THE CENTER LINE SURVEY OF PRIMARY STATE HWY #1 NORTH OF BURLINGTON; ALSO EXCEPT THAT PORTION THEREOF CONVEYED TO THE STATE OF WASHINGTON BY DEED RECORDED UNDER AF#756185 FOR HIGHWAY PURPOSES. SURVEY AF#20090807006313

(1.8800 ac) WESTERN PETERBILT BINDING SITE PLAN L99-0003, LOT 6, ACRES 1.88, (DR17 DK03). (DR17 DK03).

## ***3.2 Site and Vicinity Physical Characteristics***

### *3.2.1 Geologic Summary*

According to the *Geologic Map of the Mt. Vernon 7.5-minute quadrangle, Skagit County, Washington* published by the USGS (Open-File Report 81-105, D.P. Dethier and J.T. Whetten, 1981) geology of the site vicinity and low lying areas to the west, north and south are comprised of Quaternary alluvium (Qa) deposited by the Skagit River system. East of the project area, as topography rises, deposits are mapped as Quaternary glacial deposits (Qe, Qvt) of the Everson Interstade and Vashon Stade. Alluvium of the Skagit River valley is generally described as sorted and interbedded clay, silt, and sand deposits with lesser occurrences of coarse sand and cobbly gravel. Glaciomarine drift in the region is typified by primarily silt and clay deposits, relatively unsorted containing coarse material and local lenses of coarse-grained outwash. Vashon-age till is generally unsorted, unstratified, and consolidated from glacial ice sheet advance.

Primary soils at the site and its vicinity are mapped as *Sumas Silt-Loam*, generally silt loam becoming silty clay loam and coarse sand with depth. The *Sumas Silt-Loam* unit is poorly drained and classified as Hydrologic Group D, representing a very slow infiltration (NRCS web soil survey). The secondary soil comprising the north-east portion of the site is mapped as *Field Silt-Loam*, generally silt loam becoming stratified sand to loamy fine sand and stratified sand to very fine sandy loam with depth. The *Field Silt-Loam* unit is moderately well drained and classified as Hydrologic Group C, representing slow infiltration (NRCS web soil survey). The winter seasonal water table is present within 1 to 3 feet of the surface.

### *3.2.2 Hydrogeologic Summary*

A groundwater survey was outside the scope of this report. Hydrogeologic conditions for the subject property were inferred from well logs obtained on the Washington State Department of Ecology website, other geotechnical reports completed at nearby properties, available geologic and topographic maps, and regional well log data as readily available. Based on this information it is likely that local near-surface groundwater flow and surface runoff is generally directed in a roughly westerly direction in the immediate vicinity of the subject property. Topographic profiles to the north, south, and west exhibit similar elevations to the subject property. Eastward topography rises on a west-facing hillside outside the vicinity of the subject property. Although due to the rolling nature of area topography on the site scale, local variations may exist as

shallow groundwater flow may vary similarly to topography from site to site. Also both the elevation of the water table and direction of groundwater movement can vary according to seasonal weather conditions. Based on soil survey data and local knowledge, the water table is expected to be as shallow as approximately 1 to 3 feet from the surface in the winter months.

The Skagit River is approximately 1.25 miles away to the west and northwest of the site. Britt Slough is located approximately 0.25 miles away to the west. The entirety of the site is mapped within the 100-year flood plain.

### ***3.3 Site Description***

#### *3.3.1 Public Utilities*

According to available information and interview with the current owner, the site is serviced by PUD water. An existing septic system serves the buildings on site. No active or decommissioned drinking water wells or irrigation wells are known to be present on site.

#### *3.3.2 Roads*

Primary vehicle access into the main subject property is currently provided by western edge of the property bordering Old Hwy 99. Traffic is directed by a single island at the center of the road-front access. The secondary parcels to the south are undeveloped and have unpaved vehicle access to dirt and grass lots via Old Hwy 99 and Suzanne Ln to the south of the parcels.

#### *3.3.3 Building Conditions*

At present there are six permanent buildings located on the main parcel of the site. The buildings are currently being used or have recently been used for general ongoing site operations and commerce including retail, restaurant-café, truck wash, and storage.

A single story office building is located on the southern boundary of the main parcel. The office building was constructed in 1957 and is 4344 square feet according to the Skagit County Assessor's website records. The building appears to be constructed of metal framing with a shallow foundation and metal roof and siding. The building is currently being used as a storage facility.

The five remaining buildings on the property were constructed in 1978. An approximately 4000 square foot storage utility building, constructed of metal framing on a shallow foundation with a metal roof and siding is located adjacent to the northern border of the parcel. The northwest corner of the parcel is occupied by an approximately 1280 square foot retail store, constructed of wood framing on a shallow foundation. Centered in the parcel is an approximately 4000 square foot truck washing building, constructed of metal arch-rib framing on a shallow foundation. Immediately south of the truck washing building is an approximately 1800 square foot commercial gas-station, constructed of wooden framing on a shallow foundation. Bordering the southern boundary of the main parcel is an approximately 4280 square foot restaurant, constructed of metal arch-rib framing on a shallow foundation.

Gas station fueling facilities are located to the west and south of the gas station building. A small weigh station building is located near the road-front access at the west boundary of the parcel, next to the traffic island.

#### *3.3.4 Surface Conditions*

The main parcel exterior is developed with a paved parking and storage lot. Paving conditions on the west edge of the parcel are in fair condition. Paving conditions on the east side of the parcel are poor and appear gravelly and pot-holed. Site access to the main parcel is unrestricted along the western border. The northern border of the parcel, where shared with adjacent storage and greenhouse facility, is restricted by chain-linked fence with barbed wire. The main parcel extends to the east beyond the proposed site where it is currently used as a stone and gravel landscaping business. East of the gravel storage site, the parcel is bordered by I-5.

The undeveloped secondary parcels to the south of the site are primarily grass and soil with some trees and low vegetation. Access is unrestricted where bordering Old Hwy 99 to the west, Suzanne Ln to the south and a paved parking lot to the east. Low vegetation and thick brambles make access between primary and secondary parcels difficult.

Within the site, the surface has been visibly altered for building and parking development, although current grade may be similar to original grade. Topography of the immediate site vicinity slopes very gently westward and similar topography continues west to Britt Slough and the Skagit River. East of the site within approximately 0.5 miles, topography rises along the west flank of Little Mountain.

### ***3.4 Uses of Subject Property and Adjoining/ Surrounding Properties***

#### *3.4.1 Current Use of Site*

The primary parcel is in full use as a gas station, truck stop, restaurant, and retail store (See Site Plan and Aerial Photo, Section 10.2). All facilities are in active use. Fueling and temporary passenger-car parking are to the west and south of the gas station and truck washing building. Temporary and long-term truck parking is located to the east of the gas station. The exterior and buildings are also partially in use for storage of tools and machinery from the owner's past business practices.

The secondary parcels are undeveloped and are not in use at this time.

#### *3.4.2 Past Use of Site*

MTC performed review of available site and area documentation coupled with interviews with available knowledgeable parties regarding the site and its historical usage. MTC also used a search of the chain of title for the subject property, a review of available aerial photography, and the results of the City Directory searches, to evaluate past uses of the subject property. The property is outside of Certified Sanborn Map coverage.

Historical aerial photos from prior to 1954 are not discernible on the site scale, however the site vicinity appears to be generally rural farmland, sparse residences, and undeveloped acreage. Development of the main parcel of the site began in the mid-1950s. The main parcel was developed to its current condition as a truck-stop and restaurant in 1953. The truck stop burned in 1976, was reconstructed in 1978 and has been operated as such to present day. *Omstead, Ernest J* is listed as the owner of the parcel from May 1, 1983 until February 20, 1998. The parcel was purchased by *Singh Brothers, LLC* in February, 1998 and sold to *Old 99 LLC* on February 1, 2006.

No other historical information on site occupancy or usage conditions was available from due diligence research performed under the scope of this study in accordance with Phase 1 ESA practices at the time of this report. Specific information garnered from interviews is presented in Section 7 below.

### 3.4.3 *Current and Past Use of Adjoining Properties*

The site is within an area of present and historic commercial use. Currently adjoining properties include small commercial and rural businesses, residences, and undeveloped land. Current uses for the adjoining properties include the following:

- To the north: Residences, commercial storage, and *Skagit Gardens* (garden supply wholesalers).
- To the west: Old Hwy 99, agriculture land, and railroad corridor.
- To the south: Suzanne Ln, undeveloped cleared land, and *Northwest Propane* (propane distribution company).
- To the east: *Northstar Stone & Landscaping* (landscaping supply), paved parking lot, and I-5 corridor.

Past uses of adjoining properties include the following:

- To the north: The adjacent property to the north was used for agricultural purposes.
- To the west: The adjacent property to the west was agricultural land, a railroad corridor, and Old Hwy 99.
- To the east: The adjacent property to the east was agricultural land and I-5 corridor.
- To the south: The adjacent property to the south was used for agricultural purposes.

### 3.4.4 *Surrounding Area*

The site vicinity appears to have been historically used as rural farmland or vacant until around the 1970's or 1980's. The site vicinity is within the railroad corridor that has existed since the early 1900's. Since the construction of the interstate corridor, I-5, in the early 1950's the land adjacent to the corridor has typically been used for light commercial and agricultural purposes. In addition to the subject site, other properties in the vicinity presently and in the past appear to have been used as fuel stations (e.g. gas station to the north-east near the intersection of Cedardale Rd and Anderson Rd). Some past businesses in the area appear to have been associated with light manufacturing of goods and building materials (such as lumber, concrete,

etc.). However, these sites do not appear to be in the immediate vicinity of or adjacent to the subject property based on readily available information. One business, immediately to the east, on the opposite side of I-5, and within ¼ mile of the subject site (at the intersection of Cedardale Rd and Dale Ln) is presently a refinery.

### ***3.5 Site Documents***

Documents relating to building and site development specific to the subject property were queried via public disclosure request submitted to the City of Mt. Vernon and Skagit County offices. MTC received response from Skagit County Public Health citing that records were available for review. The City of Mt. Vernon clarified that the property vicinity was just recently in the last few years annexed into the southern limit of the city, therefore they would not have records pertaining to prior development.

According to the Skagit County Assessor, a single building on site was constructed in 1957 with an approximate size of 4344 square feet. The remaining buildings were constructed in 1978 with approximate sizes of 4280 square feet, 1280 square feet, 4000 square feet, 4000 square feet, and 1800 square feet. The Phase 1 ESA research did not uncover any site documents directly relating to or providing details on any potential past uses of the property prior to the existing development and use.

Historic and recent documents relating to site environmental conditions including significant events, assessments, and remediation efforts were reviewed as available from public disclosure requests. A summary of our findings is presented below in Section 5 *Historical Document Review*.

### ***3.6 Environmental Liens***

No environmental liens were found during our records review for this site. Parties interviewed were not aware of any past or existing environmental liens.

## 4 Environmental Data Records Review

### 4.1 Standard Environmental Record Sources, Federal and State

Results of the standard environmental records review are presented in Table 1. Explanations of the sources follow the table and are detailed in the EDR Radius Search found in the appendix (See Environmental Data Resources Radius Search, Section 10.5). Absence from any of the lists below does not necessarily mean that the project site is free of hazardous substances or petroleum products. EDR performed the radius search in accordance with ASTM Standard E 1527-05.

**Table 1. Summary of EDR Radius Search Findings**

Source	Code	Search Radius (Miles)	Identified Sites
Federal RCRA Generators	RCRA-LQG	1/4	1
State and tribal-equivalent NPL	HSL	1	1
State and tribal-equivalent CERCLIS	CSCSL	1	1
State and tribal landfill/solid waste disposal site lists	SWF/LF	1/2	0
State and tribal leaking storage tank lists	LUST	1/2	1
State and tribal registered storage tank lists	UST	1/4	2
State and tribal voluntary cleanup sites	VCP	1/2	0
	ICR	1/2	1
Local lists of landfill/solid waste disposal sites	SWRCY	1/2	1
Local lists of hazardous waste/suspected contaminated sites	ALLSITES	1/2	14
	CSCSL NFA	1/2	0
Other ascertainable records	RCRA NonGen/NLR	1/4	1
	DOD	1	0
	MANIFEST	1/4	2
EDR exclusive records	EDR His Auto Stat	1/4	0
	EDR US Hist Cleaners	1/4	0

**RCRA-LQG/SQG:** The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). LQG designation relates to large quantity generators. CORRACTS designation refers to sites undergoing corrective action.

HSL: Hazardous Sites List. A subset of the CSCSL. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM). Indicates priority cleanup sites.

CSCSL: Confirmed and Suspected Contaminated Sites List. State hazardous waste site records, the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund, including HSL sites) are identified along with sites where cleanup will be paid for by potentially responsible parties. Includes sites suspected of contamination awaiting further assessment. Sites delisted are transferred to NFA list.

SWF/LF: Solid Waste Facility Database. Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

LUST List: Leaking Underground Storage Tank. Washington Department of Ecology compilation of sites that are known to have leaking underground storage tanks. An underground storage tank is defined as any tank, including underground piping connected to the tank, that is or has been used to contain hazardous substances or petroleum products and the volume of which is 10% or more below the ground surface.

Registered UST List: Underground Storage Tank. Washington Department of Ecology compilation of sites that have underground storage tanks.

VCP: Voluntary Cleanup Program Sites. Sites that have entered either the Voluntary Cleanup Program or its predecessor Independent Remedial Action Program.

State ICR: These are sites where remedial action reports have been received by the Department of Ecology, but actions have been conducted without department oversight.

SWRCY: Recycling Facility List. A listing of recycling center locations.

State ALLSITES: Facilities identified as sites of interest by the Department of Ecology.

CSCSL NFA: Sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination.

RCRA NonGen / NLR: RCRA – Non Generators. RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

DOD: Department of Defense sites.

US MINES: Mines master index file.

MANIFEST: Hazardous Waste Manifest Data.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations. EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR US Hist Cleaners: EDR Exclusive Historic Dry Cleaners. EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

*4.1.1 Discussion of Records Search Results*

The EDR Radius Search identified a total of 25 database entries among 15 distinct sites listed in 10 environmental databases within up to a 1 mile radius of the subject property. Sites listed fell under: 1) Federal RCRA generators list (RCRA-LQG); 2) Hazardous Sites List (HSL;1), State and Tribal equivalent NPL; 3) Confirmed and Suspected Contaminated Sites List (CSCSL;1), State and Tribal equivalent CERCLIS; 4) Sites with registered State or Tribal leaking underground storage tanks (LUST); 5) Sites with registered State or Tribal underground storage tanks (UST); 6) State or Tribal voluntary cleanup sites (ICR); 7) Local list of landfill/solid waste sites (SWRCY); 8) Facility/Site Identification System Listing (ALLSITES); 9) Federal RCRA non-generators list (RCRA NonGen/NLR); 10) Hazardous Waste Manifest Data (WA MANIFEST).

The Washington State Department of Ecology (WA DoE) Facility/Site Database map utility was queried for any additional sites of environmental significance in the site vicinity not listed by the EDR Radius Report. Additional notable sites discovered include:

1. Cleaves Greenhouse, 1709 Old Hwy 99 S – Hazardous waste Generator
2. Ronnies Station, 1714 Old Hwy 99 S – UST, VCP, LUST

MTC does not consider most sites identified during our records review and radius search to pose an obvious risk or past or present recognized environmental condition to the subject property. Excepting the site discussed below, such environmentally regulated sites in the vicinity of the subject property are interpreted to be of a distance and elevation from the site which does not present an obvious risk to site environmental conditions.

The EDR report maps a database entry (*Hallmark Refining Corp* – RCRA/LQG) at a location southeast of the subject property approximately 1/8 miles away at the intersection of Cedardale Rd and Dale Ln. The site is of potential concern for environmental condition of the subject property due to the list of recorded Ecology Interactions as referenced in the Washington State Department of Ecology Website, the close proximity to the subject site, and being up-gradient for local, inferred groundwater flow. The site is listed as a Federal RCRA Large Quantity Generator (RCRA/LQG). The facility is registered as a hazardous waste generator, storage, and management facility. The facility is permitted to regulate discharges wastewater to state waters and privately owned treatment works. A full records review of this facility is outside the timeframe and scope of a Phase 1 ESA.

Environmental records for the subject property likely present the greatest impact to the environmental condition of the subject property. The EDR report lists the subject property as having multiple underground storage tanks (USTs), a leaky underground storage tank (LUST), and multiple petroleum spills. The site is also listed as an Orphan site in the EDR report, with database records on lists including the HSL/CSCSL, ICR (Independent Cleanup Registry), VCP (Voluntary Cleanup Program), and RCRA Inventory.

## ***4.2 Environmental Agency Records Requests***

### ***4.2.1 Health Department Records Request***

The Skagit County Health Department was queried by Public Records Request for any information on file for the subject property relevant to present or past site environmental conditions or interactions. Documents were provided to MTC indicate activities involving investigation, removal, and monitoring of petroleum spills have occurred since 1989. A Hydrocarbon Contamination Assessment was performed in 1989, which encountered petroleum impact in both soil and groundwater in borings and monitoring wells to the west and east of the truck stop. In 1993 an Interim Action Cleanup Report was filed by the Department of Ecology,

which documented the remediation of site soils and groundwater in the area to the west of the truck stop and store.

#### *4.2.2 Washington Department of Ecology Contact*

The Washington Department of Ecology (WA DoE) was queried by Public Records Request for any information on file for the subject property relevant to present or past site environmental conditions or interactions. An MTC environmental professional visited the regional office to review available records. A summary of our findings of document review, including WA DoE project files, is presented below in Section 5 *Historical Document Review*.

### **4.3 Physical Setting Sources**

Sources used to describe the geology, hydrology, topography and other physical aspects of the property are listed below.

1. Environmental Data Resources Inc. (2013) EDR Radius Map Report with GeoCheck: 3228 Old Highway 99 South, Mount Vernon, WA. (Inquiry #3710125.2s on August 28, 2013).
2. Environmental Data Resources Inc. (2013) Historical Topographic Map Report: 3228 Old Highway 99 South, Mount Vernon, WA. (Inquiry #3710125.4 on August 29, 2013).
3. Environmental Data Resources Inc. (2013) Aerial Photo Decade Package: 3228 Old Highway 99 South, Mount Vernon, WA. (Inquiry #3710125.5 on August 29, 2013).
4. National Resources Conservation Service Web Soil Survey 2.0 Map.
5. <http://websoilsurvey.nrcs.usda.gov/app/>
6. United States Geological Survey (1981) *Geologic Map of the Mt. Vernon 7.5-minute Quadrangle, Skagit County, Washington, Open File Report 81-105 (Dethier, D.P. and Whetten, J.T.)*.

## ***4.4 Historical Use Information***

### *4.4.1 References*

1. Environmental Data Resources Inc. (2013) EDR Radius Map Report with GeoCheck: 3228 Old Highway 99 South, Mount Vernon, WA. (Inquiry #3710125.2s on August 28, 2013).
2. Environmental Data Resources Inc. (2013) Certified Sanborn Map Report: 3228 Old Highway 99 South, Mount Vernon, WA. (Inquiry #3710125.3 on August 28, 2013).  
\* NO INFORMATION AVAILABLE - UNMAPPED PROPERTY AREA \*
3. Environmental Data Resources Inc. (2013) City Directory: 3228 Old Highway 99 South, WA. (Inquiry #3710125.6 on September 3, 2013).
4. Environmental Data Resources Inc. (2013) Aerial Photo Decade Package: 3228 Old Highway 99 South, WA. (Inquiry #3710125.5 on August 29, 2013).

### *4.4.2 Title History*

The title history was accessed via Skagit County Assessor on-line property records search. Parcels have had various transaction histories since the mid-1980s. The main parcel (P29546) earliest recorded transaction in 1983 lists Olmstead, Ernest J as the buyer and does not list a seller. The parcel was transferred to Singh Brothers, LLC in 1998 and then to Old 99, LLC in 2006. Three parcels on the southern spur (P119262, P119265, P119267) of the property are listed as having a single owner (Colco, LLC) and no transaction history recorded. The parcel in the southwest corner of the site (P119263) is recorded to have been transferred from Colco, LLC to Little, Thomas A in 2004. See appendix section 10.4 for the tabular results of this title review.

## **5 Historical Document Review**

### ***5.1 Previous Cleanup Actions***

A Hydrocarbons Assessment Report was filed on November 13, 1989, which documented the presence of petroleum hydrocarbons in the soil and groundwater associated with the western tank nest and immediately east of the truck stop. An Interim Action Cleanup Report was filed by the Department of Ecology on January 8, 1993. The report indicated that a previous tank nest and associated contaminated soils resulting from a 1987 spill of 200-300 gallons were removed. The tank nest that was removed may be erroneously referred to in the 1993 DOE report as the “eastern” nest, when all other information, including the site sketch and the Site Interview in Section 7, indicate that it was the “western” nest. Groundwater monitoring wells were installed around the previously excavated western tank nest site in 1997.

A sampling event occurred at the site in March, 1999. The event comprised nine (9) samples from storm drain location around the property. Documentation indicates the event was prompted by human detection of petroleum odors.

### ***5.2 Previous Phase II Environmental Site Assessment***

A phase II environmental site assessment was performed by Associated Environmental Group, LLC (AEG) and completed in 2006. The Phase II ESA covered soil and groundwater samples, surface hydrology, subsurface geology and stratigraphy, future contamination potential, and cleanup feasibility. The study was performed as a means to determine the extent of soil and groundwater contamination at the Truck City site. Analysis was performed on groundwater and soil samples from 11 bore holes around the Truck City site.

The phase II ESA completed by AEG reports site history not confirmed by this report but that is potentially critical. The phase II ESA noted that the site was first developed as a fueling facility and truck stop in 1952-1953 and operated eleven USTs until the facility burned in 1976. The current UST system was installed in 1978, but the initial USTs remained in place until they were decommissioned and removed in 1993. During decommissioning, six 5000-gallon USTs, two 500-gallon USTs and one former septic tank used as a waste oil tank were removed along with ~6000 cubic yards of petroleum contaminated soils (PCS) and ~90,000 gallons of petroleum contaminated groundwater.

At the time of the study, AEG reported observing seven monitoring wells on site noted to be in “very poor” condition. AEG reported sampling of three monitoring wells in 2003 though no petroleum hydrocarbons were detected.

In addition, AEG also reported observing “an excessive amount of water” in one of the USTs. AEG approximated the volume of water as 58 gallons. No other information on the condition of the UST or any resulting cleanup was reported.

### ***5.3 Results and Conclusions***

The laboratory analyses from the 1999 storm drain sampling event resulted in several of the locations having detectable, although relatively low, amounts of diesel range compounds. The phase II ESA, performed by AEG in 2006, found no evidence of petroleum hydrocarbons in soil or groundwater samples that were tested to a depth of 8 feet below ground surface in the western portion of the site extending immediately east of the truck stop building. AEG concluded that at the time of the study, no groundwater or soil contamination was identified. AEG did not recommend further investigation or cleanup. Although, the Phase II ESA did not confirm evidence of petroleum contamination, the presence of two oil tanks was noted. A 2012 Skagit County Public Health Source Control visit letter documented the existing storm water system and fueling island conditions and stated that there did not appear to be surface sources contributing to environmental impact.

## **6 Site Reconnaissance**

### ***6.1 Methodology and Limiting Conditions***

The site reconnaissance was performed on September 9, 2013 by an environmental professional of MTC, Inc. Weather conditions at the time of the visit were clear and dry with temperatures in the mid-70s. Aside from obstructions of visible surface conditions due to local areas of thick vegetation, stored goods, and parked vehicles, no other limiting factors were encountered during exterior site reconnaissance. The subject property was traversed on foot, and surrounding properties were inspected and photographed (See Photographs of Site, Section 10.3). Bordering areas and neighboring sites were observed from the perimeter of the subject property and adjacent publicly accessible locations.

Reconnaissance was conducted among interior commercial spaces, in accordance with ASTM E 1527-05 guidelines. The exterior of the restaurant-café was observed.

The site contains common interior spaces for community use. Utility buildings and the truck wash building were open and visually inspected as accessible from the entrances, however no attempt was made to move stored items, nor were all contents catalogued.

### ***6.2 General Site Setting***

Observations during site reconnaissance confirmed the primarily commercial use of the immediate site vicinity. The area to the north appears in use as a nursery/greenhouse area. The development directly east of the site is additional truck parking and a landscaping supply yard. West of Old Highway 99 is farmland. Confirmed south of the subject property is currently undeveloped grassland and a commercial propane supply yard. Visible conditions along the boundaries of the property and surrounding area were consistent with reviewed physical setting sources including recent aerial photos.

### ***6.3 Exterior Observations***

At the time of the visit, the truck fueling, service, storage and restaurant-café areas were generally occupied and appeared consistently in use for commercial purposes. Site common corridors were generally maintained. Minor *de minimus* pavement staining from passenger

vehicles was observed locally on common roadways and parking areas. Power poles and fixtures throughout the site appeared in decent condition viewed from afar, however if transformers are present they may be of an age to contain PCBs.

Utility buildings appeared to be nominally maintained and possessed concrete floors. Aside from small to medium sized commercial-use cans of cleaning, maintenance, and fuel supplies, no drums or barrels of an unknown nature were observed. The noted conditions were of a size, nature, and extent to be interpreted as *de minimus* site conditions considering the commercial use of the subject property.

Immediately to the east of the utility building at the north of the property was one above-ground metal tank. A silver tank of approximately 1500 gallons size appeared to be a former oil or fuel tank and does not appear to be currently in operation. No evidence of petroleum products use such as outer staining on the tanks or spills on the ground surface was observed. No potential petroleum heating oil tank locations or underground utility hookups were observed.

Monitoring wells that were documented as having been associated with earlier environmental monitoring were present near the western edge of the property, adjacent to Old Highway 99. Well casings were observed to be intact, and they generally surround an area of approximately 100 feet by 100 feet in the vicinity of past soil removal and pavement replacement.

Generally the asphalt pavement appeared intact from the western boundary at Old Highway 99 to the store and all fuel service islands. Near the rear of the store, which is located approximately in the center of the study area, toward the east the pavement was partially or totally removed, and a firm, uneven soil surface was observed. Storm water drains were observed in this region approximately in line with the storm drain inlet at the southern site boundary.

The visual site reconnaissance did not encounter any obvious evidence of existing environmental conditions or apparent hazardous conditions on the site, with exception to the large above-ground tank. Besides the permitted and operational underground fuel storage tanks for the service station, no obvious evidence of potential unknown underground storage tanks was observed. Evidence of past removed above-ground storage tanks was identified, as stated above. Excluding *de minimus* conditions of common materials and private household refuse on some lots, there were no stockpiles of solid waste, nor indications of past disposal of hazardous waste. The grease trap that the café maintains was present on the south side of the building. No spills, large stains, or conspicuous stressed or absent vegetation was noted. There were no pits, ponds,

or lagoons on site. Therefore the exterior site reconnaissance confirmed site use and did identify some historical potential recognized environmental conditions.

#### **6.4 Interior Observations**

The store, storage buildings, and truck wash were accessible at the time of our visit. Observed through a window, the interior was in good condition and appeared to be in working order. Materials were organized, with no obvious evidence of past or present spills of hazardous substances. Small to medium container goods were stored including cleaning supplies, paint or stain cans, and oil or gas cans for transport truck service.

No obvious hazardous conditions were visible within or adjacent to the storage, truck wash, or restaurant-café buildings, excepting *de minimus* conditions which were interpreted to be small stained spots and able to be remedied via typical disposal efforts. The truck wash building was in use as a washing facility, and no obvious indications of release of hazardous substances or petroleum products to the storm drain system was apparent.

There was evidence of one possible abandoned underground oil storage tank under the floor inside the store. A cover plate was observed in the main part of the store.

## 7 Interviews

### 7.1 Site Owner/Manager

The knowledgeable current owner and site manager parties were contacted by phone and on site to discuss current and past site use and identify any potential environmental conditions on the subject property. On September 9, 2013, the current owner representative, Mr. Bart Smith, participated in an interview at the subject property.

Mr. Smith confirmed that he has owned and managed the property for approximately 7 years and is generally knowledgeable of its present use and recent history. He stated that he is the owner and manager at this time.

#### 7.1.1 Hazardous Conditions/Substances in Connection with Identified Uses

Respondent was not aware of any hazardous substances such as chemicals or controlled wastes existing on site associated with the current or past identified uses. No past site use for manufacturing or industrial purposes was known. No hazardous conditions were reported. Mr. Smith was not aware of specialized oil/grease separators in use at the truck wash drains, and he was not aware of any releases of oils or greases into the drain system from the truck wash.

#### 7.1.2 Hazardous Substances/Petroleum Containers and Unidentified Substance Containers

Respondent cited the typical commercial extent of use of petroleum products on site to his knowledge. Other chemicals and storage containers are believed to be of a grade and sized to accommodate the servicing of transport trucks, are stored upright and intact, and are not of particular concern. He stated that he was not aware of any large petroleum containers or stockpiles, or hazardous substances stored on site.

#### 7.1.3 Storage Tanks (ASTs, USTs)

Respondent stated that to his knowledge no storage tanks for hazardous substances currently exist on site. Four (4) permitted and operational underground storage tanks are known to exist on site, and 4 former underground storage tanks were located on site in the past and were removed under prior ownership. One additional underground oil storage tank was understood to have been emptied and abandoned in-place and currently exists beneath the central store

building. No stationary operational above-ground storage tanks for petroleum fuel, hazardous substances, or waste substances are known to have existed on site.

Mr. Smith confirmed the older silver metal tank behind the storage building was a deactivated tank. It is unknown as to the plan for removal of this tank.

#### *7.1.4 Indications of PCBs*

Respondent was not aware of any concerns existing on site associated with the presence of PCBs currently or in the past.

#### *7.1.5 Indications of Solid Waste Disposal*

Respondent was not aware of any environmental concerns existing on site associated with solid waste disposal, either improperly deposited or permitted, currently or in the past.

#### *7.1.6 Historical Recognized Environmental Conditions*

Respondent was aware of historical recognized environmental conditions on the subject property prior to and during his involvement. It was stated that the site was previously a fueling station and that prior to his ownership a large petroleum spill occurred at the western part of the property extending to Old Highway 99. Remediation of the impacted soils was subsequently undertaken and monitored by Department of Ecology, monitoring wells installed, and the pavement replaced. Mr. Smith stated that a later petroleum spill of approximately 60 gallons occurred when a driver lost control at the pump in about 2006 and was documented and monitored by Department of Ecology. Reparation efforts were made, but apparently most of the spilled fuel entered the storm drain system in the center and south of the property and migrated away from the site.

#### *7.1.7 Surrounding Area Environmental Conditions*

Respondent was not aware of any environmental conditions existing on adjacent and nearby properties. When asked regarding any potential concerns among sites bordering the subject property presently or in the past, he was not aware of any issues.

#### *7.1.8 Additional Information*

No additional information was obtained.

## ***7.2 Local Knowledgeable Officials***

### *7.2.1 Local Health, Fire, and Planning Departments*

Other than the documentation that was acquired from public records requests, other local officials were not contacted or did not have additional pertinent site information.

## 8 Opinions of Significant Findings

Most environmentally regulated sites in the vicinity of the subject property identified by EDR Radius Search and review of the Washington State Department of Ecology Facility/Site Database are interpreted to be of a distance and elevation from the site which does not present an obvious risk to site environmental conditions. Therefore, MTC does not consider the sites identified during our records review and radius search to pose a significant risk of past or present recognized environmental condition to the subject property, with the potential exception of the following site which was evaluated based on available information at this time:

1) The *Hallmark Refining Corp*, located at the intersection of Cedardale Rd and Dale Ln, is a federally listed large quantity generator of hazardous materials. Available records do not indicate a prior or past environmental concern, excepting its continued production, storage, and management of hazardous waste and permitted discharge of wastewaters into state waters and privately owned treatment works. In addition, the site appears to be up-gradient from the project site with respect to regional and local groundwater flow patterns (typically east to west). The above conditions may have contributed to a recognized environmental condition presently affecting the site.

The subject property is in an area of commercial and storage use presently and historically within the last approximately 50 to 60 years. Prior to the 1950s, the site vicinity was used generally as farmland or forest land with sparse residences. MTC does not consider historic use of the subject property prior to the 1950s or sites to the north and south to pose an obvious risk of a recognized environmental condition to the subject property. Site use after the 1950s as a commercial trucking fueling station may have contributed to a recognized environmental condition at the site presently.

It is our opinion, based on the known historic site use as a commercial trucking fueling station, recorded LUSTs and spills on site, and potentially undocumented oil tanks that further investigation into current site environmental conditions is warranted. Given the extent of records review conducted for this Phase 1 ESA, MTC does not recommend further research be conducted for additional information at this time.

In this case, MTC recommends an exploratory environmental sampling program be conducted on the site with the primary goal of assessing the general presence and extent of potential petroleum

contamination from past and current use. MTC can be contacted for further recommendations pertaining to exploration locations, which may include but not be limited shallow soil sampling at the eastern portion of the site, soil and groundwater samples deeper than the previous test depths in the western part of the site. It may also be advisable to conduct limited investigations for undocumented underground storage tanks that may be present.

## 9 Conclusions and Recommendations

We have performed a Phase 1 Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-05 for the subject property, the Truck City Truck Stop and adjoining parcels (3228 Old Highway 99 South, Skagit County Parcels: P29546 (main), P119262, P119263, P119265, and P11926), in Mount Vernon, Washington. Any exceptions to, or deletions from, this practice are described in Section 2 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property except for the following:

- Known site history as a commercial fueling station and documented underground storage tanks (USTs/LUSTs) and petroleum-hydrocarbon surface spills.
- Existing facility up-gradient for groundwater flow listed as a hazardous waste large quantity generator

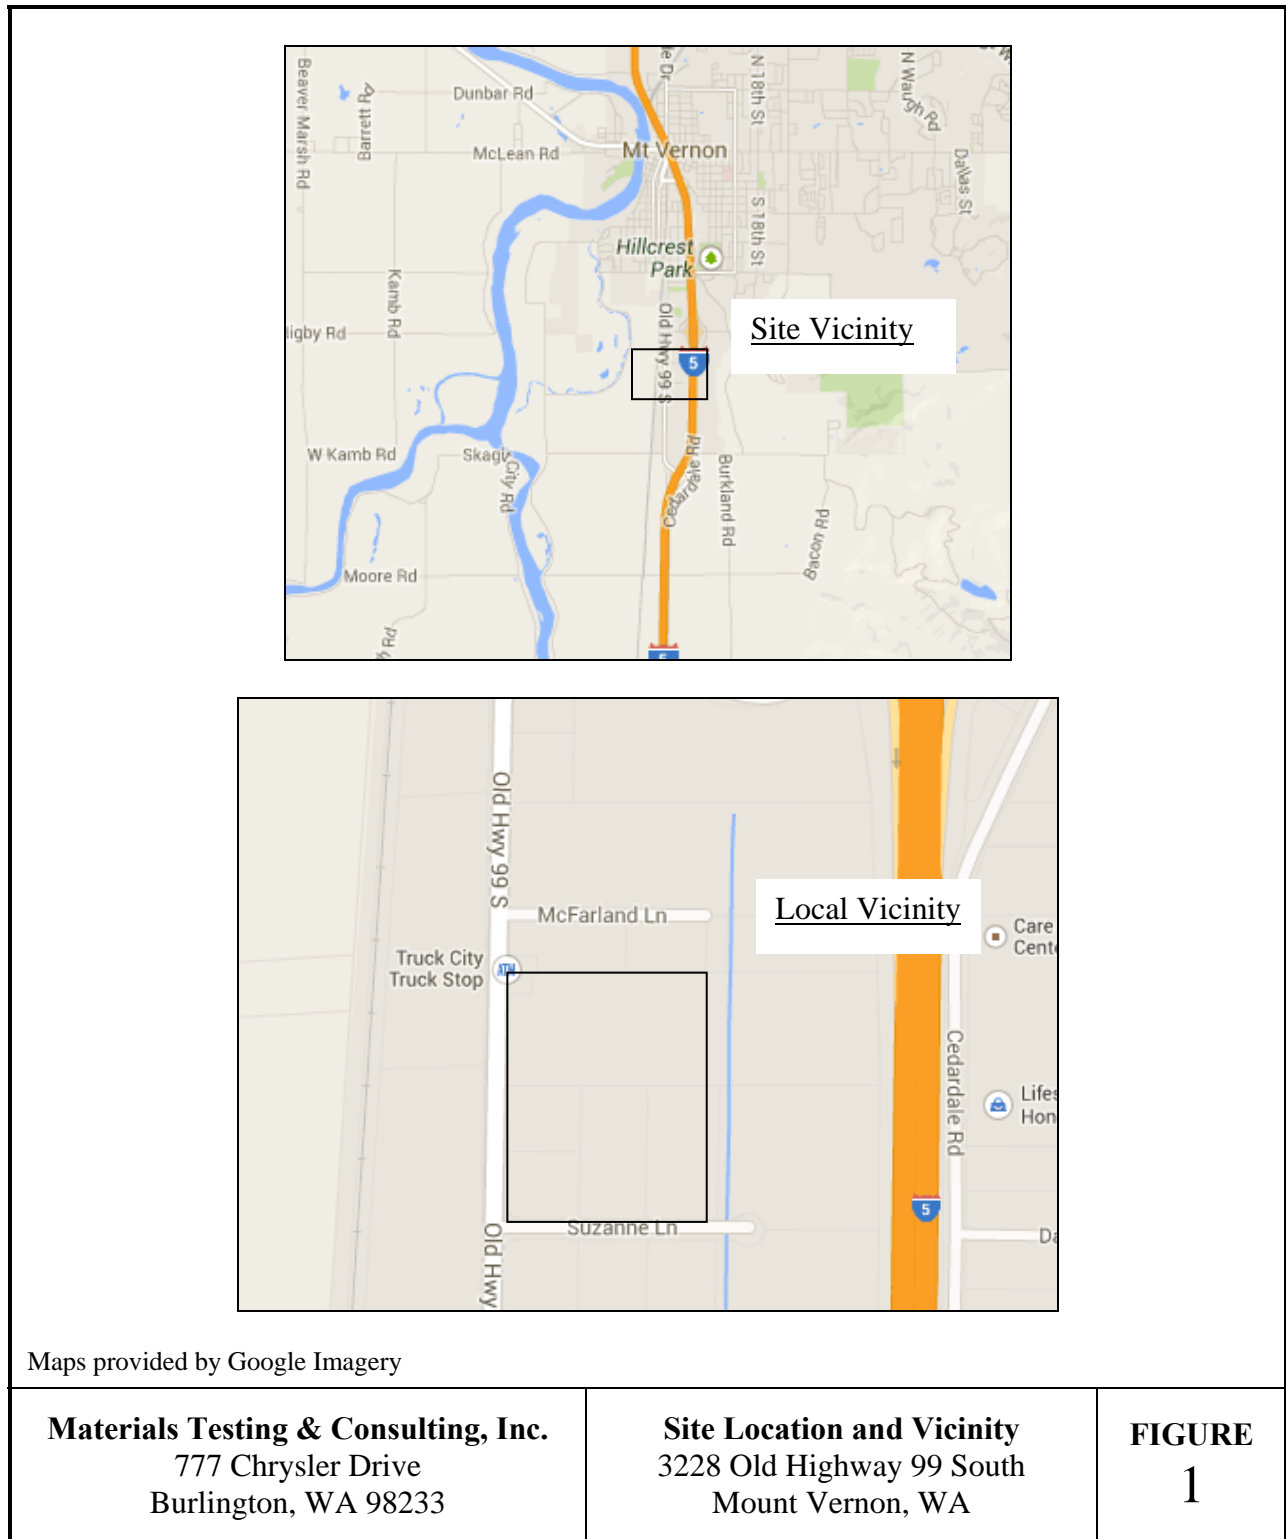

MTC recommends a limited exploratory environmental sampling program be conducted on the site exterior with the goal of assessing the general presence and extent of potential petroleum contamination from past and current use. MTC recommends that we be contacted at the client's discretion to discuss additional environmental investigation services.

MTC understands the client proposes to remove the existing building for site redevelopment. Therefore the condition of building interiors in use as commercial gas station, restaurant, storage, and truck wash are considered insignificant for the purpose of this Phase 1 ESA.

### ***10.4 Title History and Chain of Title***

The title history was accessed via Skagit County Assessor on-line property records search. Parcels have had various transaction histories since the mid-1980s. The main parcel (P29546) earliest recorded transaction in 1983 lists Olmstead, Ernest J as the buyer and does not list a seller. The parcel was transferred to Singh Brothers, LLC in 1998 and then to Old 99, LLC in 2006. Three parcels on the southern spur (P119262, P119265, P119267) of the property are listed as having a single owner (Colco, LLC) and no transaction history recorded. The parcel in the southwest corner of the site (P119263) is recorded to have been transferred from Colco, LLC to Little, Thomas A in 2004.

Parcel P29546:

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

3228 OLD HIGHWAY 99 SOUTH  
MOUNT VERNON, WA 98273

#### COORDINATES

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal RCRA generators list***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/18/2013 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

#### ***State- and tribal - equivalent NPL***

HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the HSL list, as provided by EDR, and dated 02/27/2013 has revealed that there is 1 HSL site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

## EXECUTIVE SUMMARY

### **State- and tribal - equivalent CERCLIS**

CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the CSCSL list, as provided by EDR, and dated 04/24/2013 has revealed that there is 1 CSCSL site within approximately 1 mile of the target property.

<i>MOTOR TRUCKS INC MOUNT VERNON</i>	<i>2501 HENSON ROAD</i>	<i>N 1/2 - 1 (0.778 mi.)</i>	<i>21</i>	<i>107</i>

### **State and tribal leaking storage tank lists**

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Ecology's Leaking Underground Storage Tanks Site List.

A review of the LUST list, as provided by EDR, and dated 05/21/2013 has revealed that there is 1 LUST site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>GAI'S SEATTLE FRENCH BAKING CO</i>	<i>1772 OLD HWY 99</i>	<i>S 1/4 - 1/2 (0.394 mi.)</i>	<i>D19</i>	<i>103</i>

### **State and tribal registered storage tank lists**

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Ecology's Statewide UST Site/Tank Report.

A review of the UST list, as provided by EDR, and dated 02/08/2013 has revealed that there are 2 UST sites within approximately 0.25 miles of the target property.

### **State and tribal voluntary cleanup sites**

ICR: These are remedial action reports Ecology has received from either the owner or operator of the site. These actions have been conducted without department oversight or approval and are not under an order or decree.

A review of the ICR list, as provided by EDR, and dated 12/01/2002 has revealed that there is 1 ICR

## EXECUTIVE SUMMARY

### ***Other Ascertainable Records***

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/18/2013 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>VALLEY FREIGHTLINER</i>	<i>524 JACKS LN</i>	<i>S 1/8 - 1/4 (0.146 mi.)</i>	<i>10</i>	<i>59</i>

MANIFEST: Hazardous waste manifest information.

A review of the MANIFEST list, as provided by EDR, and dated 12/31/2012 has revealed that there are 2 MANIFEST sites within approximately 0.25 miles of the target property.

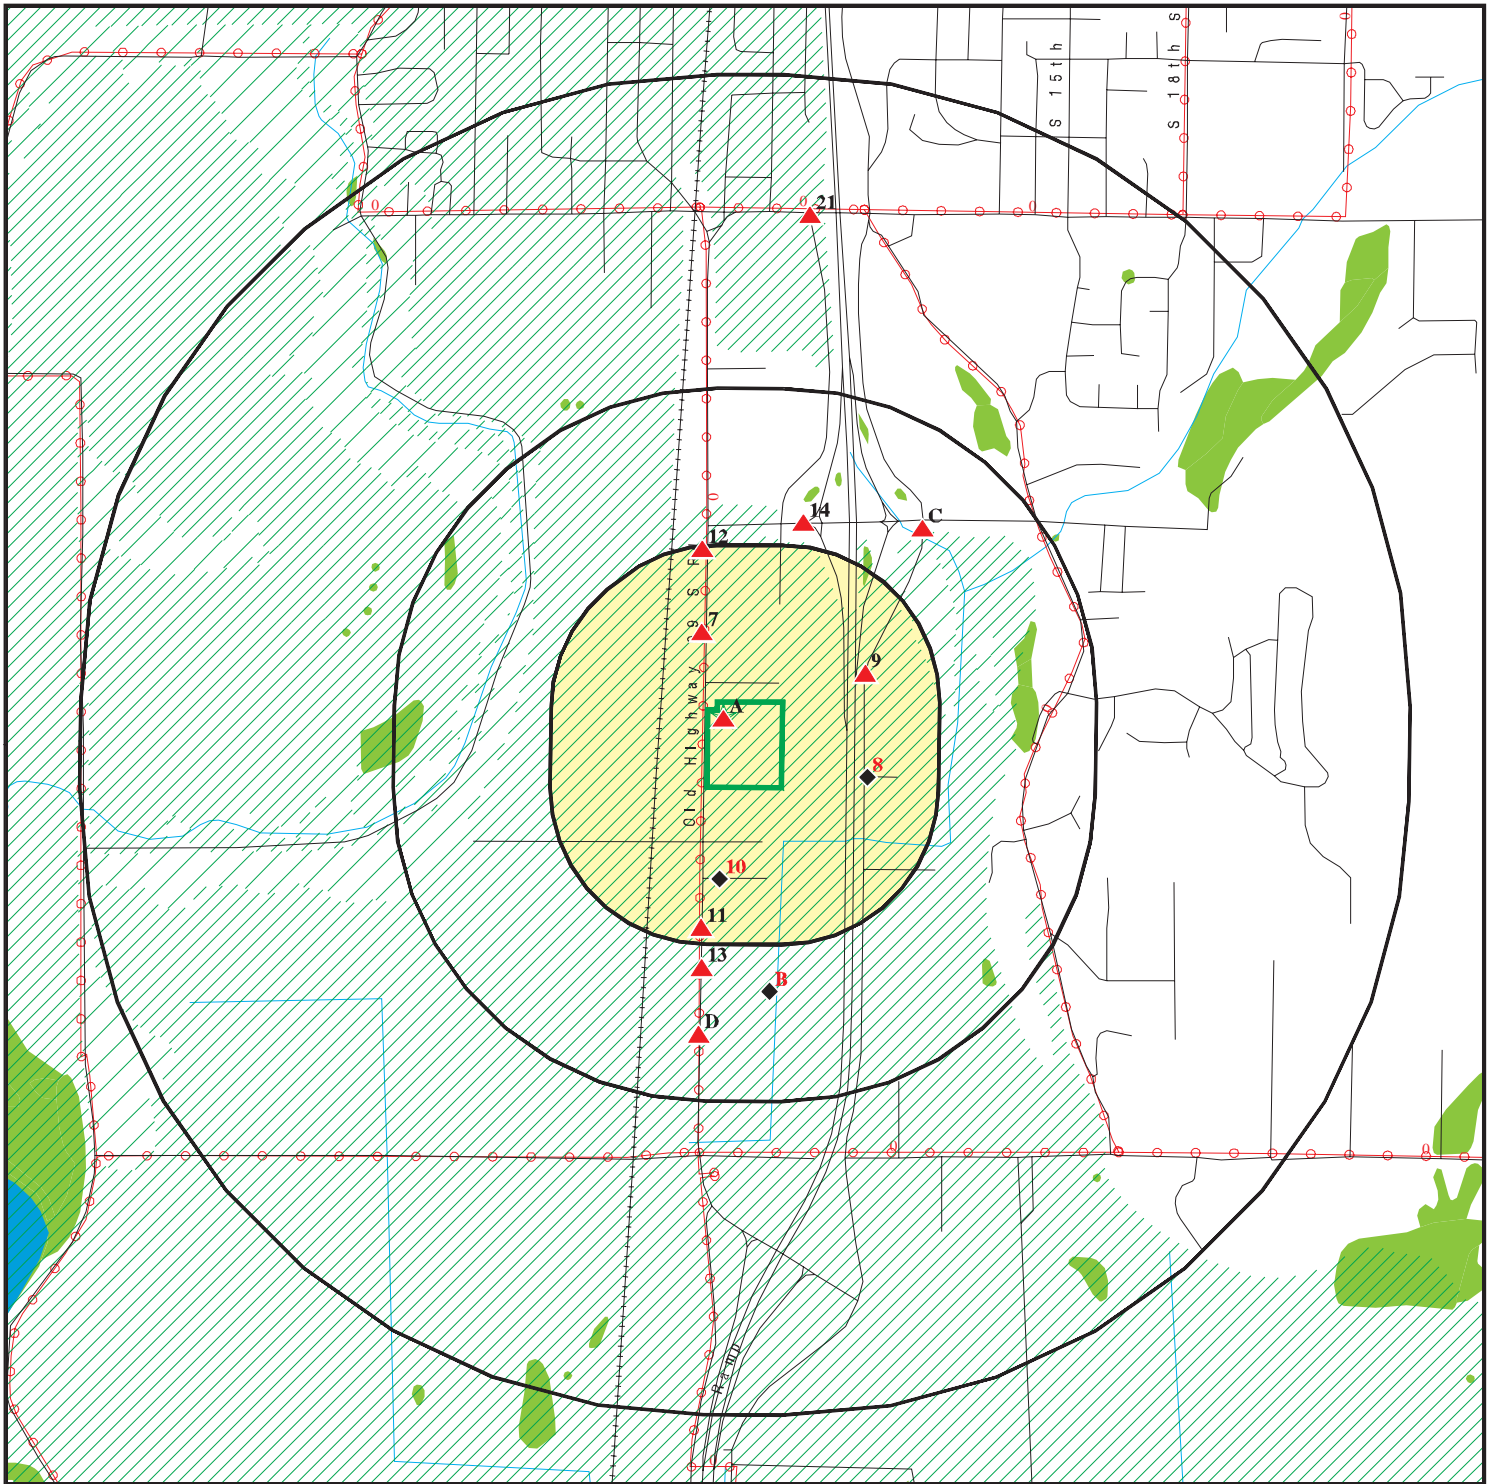

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Environmental Interest/Information System  
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

<b>A2</b>	<b>TRUCK CITY TRUCK STOP</b>	<b>FINDS</b>	<b>1015966060</b>

Site 2 of 6 in cluster A

**Actual:** FINDS:  
17 ft. Registry ID: 110054916533

Environmental Interest/Information System  
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

<b>A3</b>	<b>TRUCK CITY TRUCK STOP</b>	<b>FINDS</b>	<b>1007080322</b>

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

ALLSITES:

Land type: Private  
Classification: Large Quantity Generator  
Description: Handler: generates 1,000 kg or more of hazardous waste during any calendar month; or generates more than 1 kg of acutely hazardous waste during any calendar month; or generates more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generates 1 kg or less of acutely hazardous waste during any calendar month, and accumulates more than 1 kg of acutely hazardous waste at any time; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates more than 100 kg of that material at any time

**Owner/Operator Summary:**

Owner/operator name: HALLMARK REFINING CORP  
Owner/operator address: PO BOX 1446  
MOUNT VERNON, 98273  
Owner/operator country: US  
Owner/operator telephone: (360)428-5880 E  
Legal status: Private  
Owner/Operator Type: Owner  
Owner/Op start date: 05/02/1996  
Owner/Op end date: Not reported

Handler Activities Summary:

U.S. importer of hazardous waste: No  
Mixed waste (haz. and radioactive): No  
Recycler of hazardous waste: Yes  
Transporter of hazardous waste: Yes  
Treater, storer or disposer of HW: No  
Underground injection activity: No  
On-site burner exemption: No  
Furnace exemption: No  
Used oil fuel burner: No  
Used oil processor: No  
User oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No

Universal Waste Summary:

Waste type: Lamps  
Accumulated waste on-site: Yes  
Generated waste on-site: Not reported

**Hazardous Waste Summary:**

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003

Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D004

Waste name: ARSENIC

Waste code: D006

Waste name: CADMIUM

Waste code: D007

Waste name: CHROMIUM

Waste code: D008

Waste name: LEAD

Waste code: D011

Waste name: SILVER

Waste code: F007

Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS

Waste code: F009

Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS WHERE CYANIDES ARE USED IN THE PROCESS.

Waste code: WT02

Waste name: Washington State Dangerous Toxic Waste with a toxic constituents concentration greater than or equal to 0.001% and less than 1.0%, determined by biological testing methods or a book designation procedure.

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. **FINDS:**

Registry ID: 110005395955

**Environmental Interest/Information System**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**HAZARDOUS WASTE BIENNIAL REPORTER**

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

ALLSITES:

not required to report waste streams, so no valid State or Fed codes are available for reporting to BR.

Violation Status: No violations found

**FINDS:**

Registry ID: 110005339730

**Environmental Interest/Information System**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/09/2013	Telephone: N/A
Date Made Active in Reports: 07/10/2013	Last EDR Contact: 05/09/2013
Number of Days to Update: 62	Next Scheduled EDR Contact: 07/22/2013
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/09/2013	Telephone: N/A
Date Made Active in Reports: 07/10/2013	Last EDR Contact: 05/09/2013
Number of Days to Update: 62	Next Scheduled EDR Contact: 07/22/2013
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal Delisted NPL site list***

### DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/09/2013	Telephone: N/A
Date Made Active in Reports: 07/10/2013	Last EDR Contact: 05/09/2013
Number of Days to Update: 62	Next Scheduled EDR Contact: 07/22/2013
	Data Release Frequency: Quarterly

## ***Federal CERCLIS list***

### CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/29/2013	Telephone: 703-412-9810
Date Made Active in Reports: 08/09/2013	Last EDR Contact: 05/29/2013
Number of Days to Update: 72	Next Scheduled EDR Contact: 09/09/2013
	Data Release Frequency: Quarterly

### FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 07/31/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/09/2012	Telephone: 703-603-8704
Date Made Active in Reports: 12/20/2012	Last EDR Contact: 07/08/2013
Number of Days to Update: 72	Next Scheduled EDR Contact: 10/21/2013
	Data Release Frequency: Varies

## ***Federal CERCLIS NFRAP site List***

### CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/29/2013	Telephone: 703-412-9810
Date Made Active in Reports: 08/09/2013	Last EDR Contact: 05/29/2013
Number of Days to Update: 72	Next Scheduled EDR Contact: 05/09/2013
	Data Release Frequency: Quarterly

## ***Federal RCRA CORRACTS facilities list***

### CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

## ***Federal RCRA non-CORRACTS TSD facilities list***

### **RCRA-TSDF: RCRA - Treatment, Storage and Disposal**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/18/2013  
Date Data Arrived at EDR: 07/01/2013  
Date Made Active in Reports: 08/09/2013

## ***Federal RCRA generators list***

### **RCRA-LQG: RCRA - Large Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/18/2013  
Date Data Arrived at EDR: 07/01/2013  
Date Made Active in Reports: 08/09/2013

## ***Federal institutional controls / engineering controls registries***

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 03/14/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/29/2013	Telephone: 703-603-0695
Date Made Active in Reports: 05/10/2013	Last EDR Contact: 06/10/2013
Number of Days to Update: 42	Next Scheduled EDR Contact: 09/23/2013
	Data Release Frequency: Varies

### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/14/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/29/2013	Telephone: 703-603-0695
Date Made Active in Reports: 05/10/2013	Last EDR Contact: 06/10/2013
Number of Days to Update: 42	Next Scheduled EDR Contact: 09/23/2013
	Data Release Frequency: Varies

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/09/2005	Source: Department of the Navy
Date Data Arrived at EDR: 12/11/2006	Telephone: 843-820-7326

Number of Days to Update: 31	Next Scheduled EDR Contact: 09/02/2013
	Data Release Frequency: Varies

## ***Federal ERNS list***

### ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2012	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/17/2013	Telephone: 202-267-2180
Date Made Active in Reports: 02/15/2013	Last EDR Contact: 07/01/2013
Number of Days to Update: 29	Next Scheduled EDR Contact: 10/14/2013
	Data Release Frequency: Annually

## ***State- and tribal - equivalent NPL***

### HSL: Hazardous Sites List

The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

Date of Government Version: 02/27/2013	Source: Department of Ecology
Date Data Arrived at EDR: 03/14/2013	Telephone: 360-407-7200
Date Made Active in Reports: 04/08/2013	Last EDR Contact: 06/11/2013
Number of Days to Update: 25	Next Scheduled EDR Contact: 09/23/2013
	Data Release Frequency: Semi-Annually

## ***State- and tribal - equivalent CERCLIS***

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## CSCSL: Confirmed and Suspected Contaminated Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 04/24/2013	Source: Department of Ecology
Date Data Arrived at EDR: 04/26/2013	Telephone: 360-407-7200
Date Made Active in Reports: 06/10/2013	Last EDR Contact: 07/26/2013

	Data Release Frequency: Varies

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### **Local Brownfield lists**

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/24/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/25/2013	Telephone: 202-566-2777

Data Release Frequency: Varies

## **Local Lists of Hazardous waste / Contaminated Sites**

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 03/04/2013  
Date Data Arrived at EDR: 03/12/2013  
Date Made Active in Reports: 05/10/2013

Last EDR Contact: 06/03/2013  
Next Scheduled EDR Contact: 09/16/2013  
Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ALLSITES: Facility/Site Identification System Listing

Information on facilities and sites of interest to the Department of Ecology.

Date of Government Version: 05/08/2013	Source: Department of Ecology
Date Data Arrived at EDR: 05/09/2013	Telephone: 360-407-6423
Date Made Active in Reports: 07/25/2013	Last EDR Contact: 08/16/2013
Number of Days to Update: 77	Next Scheduled EDR Contact: 11/18/2013
	Data Release Frequency: Quarterly

## CSCSL NFA: Confirmed and Contaminated Sites - No Further Action

The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead, a No Further Action code is entered based upon the type of NFA determination the site received.

Date of Government Version: 04/24/2013	Source: Department of Ecology
Date Data Arrived at EDR: 04/26/2013	Telephone: 360-407-7170
Date Made Active in Reports: 06/10/2013	Last EDR Contact: 07/26/2013

## Records of Emergency Release Reports

### HMIRS: Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 12/31/2012	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 01/03/2013	Telephone: 202-366-4555
Date Made Active in Reports: 02/27/2013	Last EDR Contact: 07/01/2013
Number of Days to Update: 55	Next Scheduled EDR Contact: 10/14/2013
	Data Release Frequency: Annually

### SPILLS: Reported Spills

Spills reported to the Spill Prevention, Preparedness and Response Division.

Date of Government Version: 06/10/2013	Source: Department of Ecology
Date Data Arrived at EDR: 06/11/2013	Telephone: 360-407-6950
Date Made Active in Reports: 07/25/2013	Last EDR Contact: 06/10/2013
Number of Days to Update: 44	Next Scheduled EDR Contact: 09/23/2013
	Data Release Frequency: Semi-Annually

### SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Date of Government Version: 05/23/2006	Source: FirstSearch
Date Data Arrived at EDR: 01/03/2013	Telephone: N/A
Date Made Active in Reports: 03/06/2013	Last EDR Contact: 01/03/2013
Number of Days to Update: 62	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 06/18/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/01/2013	Telephone: (206) 553-1200
Date Made Active in Reports: 08/09/2013	Last EDR Contact: 08/08/2013
Number of Days to Update: 39	Next Scheduled EDR Contact: 10/14/2013

Last EDR Contact: 06/11/2013  
Next Scheduled EDR Contact: 09/23/2013  
Data Release Frequency: Annually

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 09/14/2010  
Date Data Arrived at EDR: 10/07/2011

## FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 04/09/2009  
Date Data Arrived at EDR: 04/16/2009  
Date Made Active in Reports: 05/11/2009  
Number of Days to Update: 25

Source: EPA  
Telephone: 202-566-1667  
Last EDR Contact: 08/22/2013  
Next Scheduled EDR Contact: 12/09/2013  
Data Release Frequency: Quarterly

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

Data Release Frequency: Quarterly

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

Data Release Frequency: No Update Planned

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 05/08/2012

## SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Date of Government Version: 03/07/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/09/2011	Telephone: 615-532-8599

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### EDR US Hist Cleaners: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### TACOMA/PIERCE COUNTY:

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

### Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Daycare Center Listing

Source: Department of Social & Health Services

Telephone: 253-383-1735

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

### **TARGET PROPERTY ADDRESS**

TRUCK CITY SITE  
3228 OLD HIGHWAY 99 SOUTH  
MOUNT VERNON, WA 98273

### **TARGET PROPERTY COORDINATES**

Latitude (North):	48.3949 - 48° 23' 41.64"
Longitude (West):	122.335 - 122° 20' 6.00"
Universal Transverse Mercator:	Zone 10
UTM X (Meters):	549227.7
UTM Y (Meters):	5360188.0
Elevation:	17 ft. above sea level

### **USGS TOPOGRAPHIC MAP**

Target Property Map:	48122-D3 MOUNT VERNON, WA
Most Recent Revision:	1981

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

## **NATIONAL WETLAND INVENTORY**

NWI Quad at Target Property  
MOUNT VERNON

NWI Electronic  
Data Coverage  
YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius: 1.25 miles  
Status: Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

#### Soil Map ID: 1

Soil Component Name: Sumas

Soil Surface Texture: silt loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 61 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.1
2	5 inches	16 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.1
3	16 inches	59 inches	coarse sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.1

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**Soil Map ID: 2**

Soil Component Name: Field

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 107 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	12 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.3 Min: 6.1
2	12 inches	20 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.3 Min: 6.1
3	20 inches	40 inches	stratified sand to loamy fine sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.3 Min: 6.1
4	40 inches	59 inches	stratified sand to very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.3 Min: 6.1

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**Soil Map ID: 3**

Soil Component Name: Urbanland

Soil Surface Texture: variable

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 92 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	variable	Not reported	Not reported	Max: 0 Min: 0	Max: Min:

**LOCAL / REGIONAL WATER AGENCY RECORDS**

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Water Wells

Source: Department of Health

Telephone: 360-236-3148

Group A and B well locations.

#### Water Well Listing

Source: Public Utility District

Telephone: 206-779-7656

A listing of water well locations in Kitsap County.

## OTHER STATE DATABASE INFORMATION

#### Oil and Gas Well Listing

Source: Department of Natural Resources

Telephone: 360-902-1450

Locations that represent oil and gas test well sites in Washington State from 1890 to present.

### RADON

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

#### Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

#### Epicenters: World earthquake epicenters, Richter 5 or greater

## UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

*The Sanborn Library LLC Since 1866™*

## Limited Permission To Make Copies

Materials Testing & Consulting (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

### RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

## The EDR Aerial Photo Decade Package

# EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

**When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.**

***Thank you for your business.***  
Please contact EDR at 1-800-352-0050  
with any questions or comments.

## **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.
