Subject: Permitting of Non-Motorized Trails in the Industrial Forest - Natural Resources Lands (IF-NRL Zoning Designation)
Date: Tuesday, August 01, 2017 12:59:48 PM

I support the proposed code amendment to allow trails as an outright permitted use in the Industrial Forest Natural Resource Land.

A single track non-motorized trail has minimal to no impact on the environment or forest practices, particularly if constructed within the six year period following harvest. Streamlining the current process with this amendment will allow much more efficient use of resources dedicated to recreation in the county and facilitate the development of needed trail opportunities in the near term.

Sincerely,
Art Tuftee, Trail Designer/Builder
