

Guidelines for Using the Engineers' Record of Surveys

This file contains the Engineers Record of Surveys. It provides an index to Skagit County field books 1 through 115 covering the years 1891 through 1933. The purpose of this index is to enable the user to quickly locate the volume and page number for field notes.

This index is organized by township and range. Bookmarks may be used to navigate to the appropriate location. On the left side of each page will be a map of a township and range. The map may also be marked with notation concerning various projects. On the right side will be a listing of available field notes by section. If the right side is blank there are no field notes available for that township and range.

Bookmarks may be found on the bookmark tab of the PDF file. Clicking on the bookmarks "plus" sign will show which bookmarks are available. By clicking on a bookmark you will move to that location in the file. Bookmark labels indicate the township and range for that page.

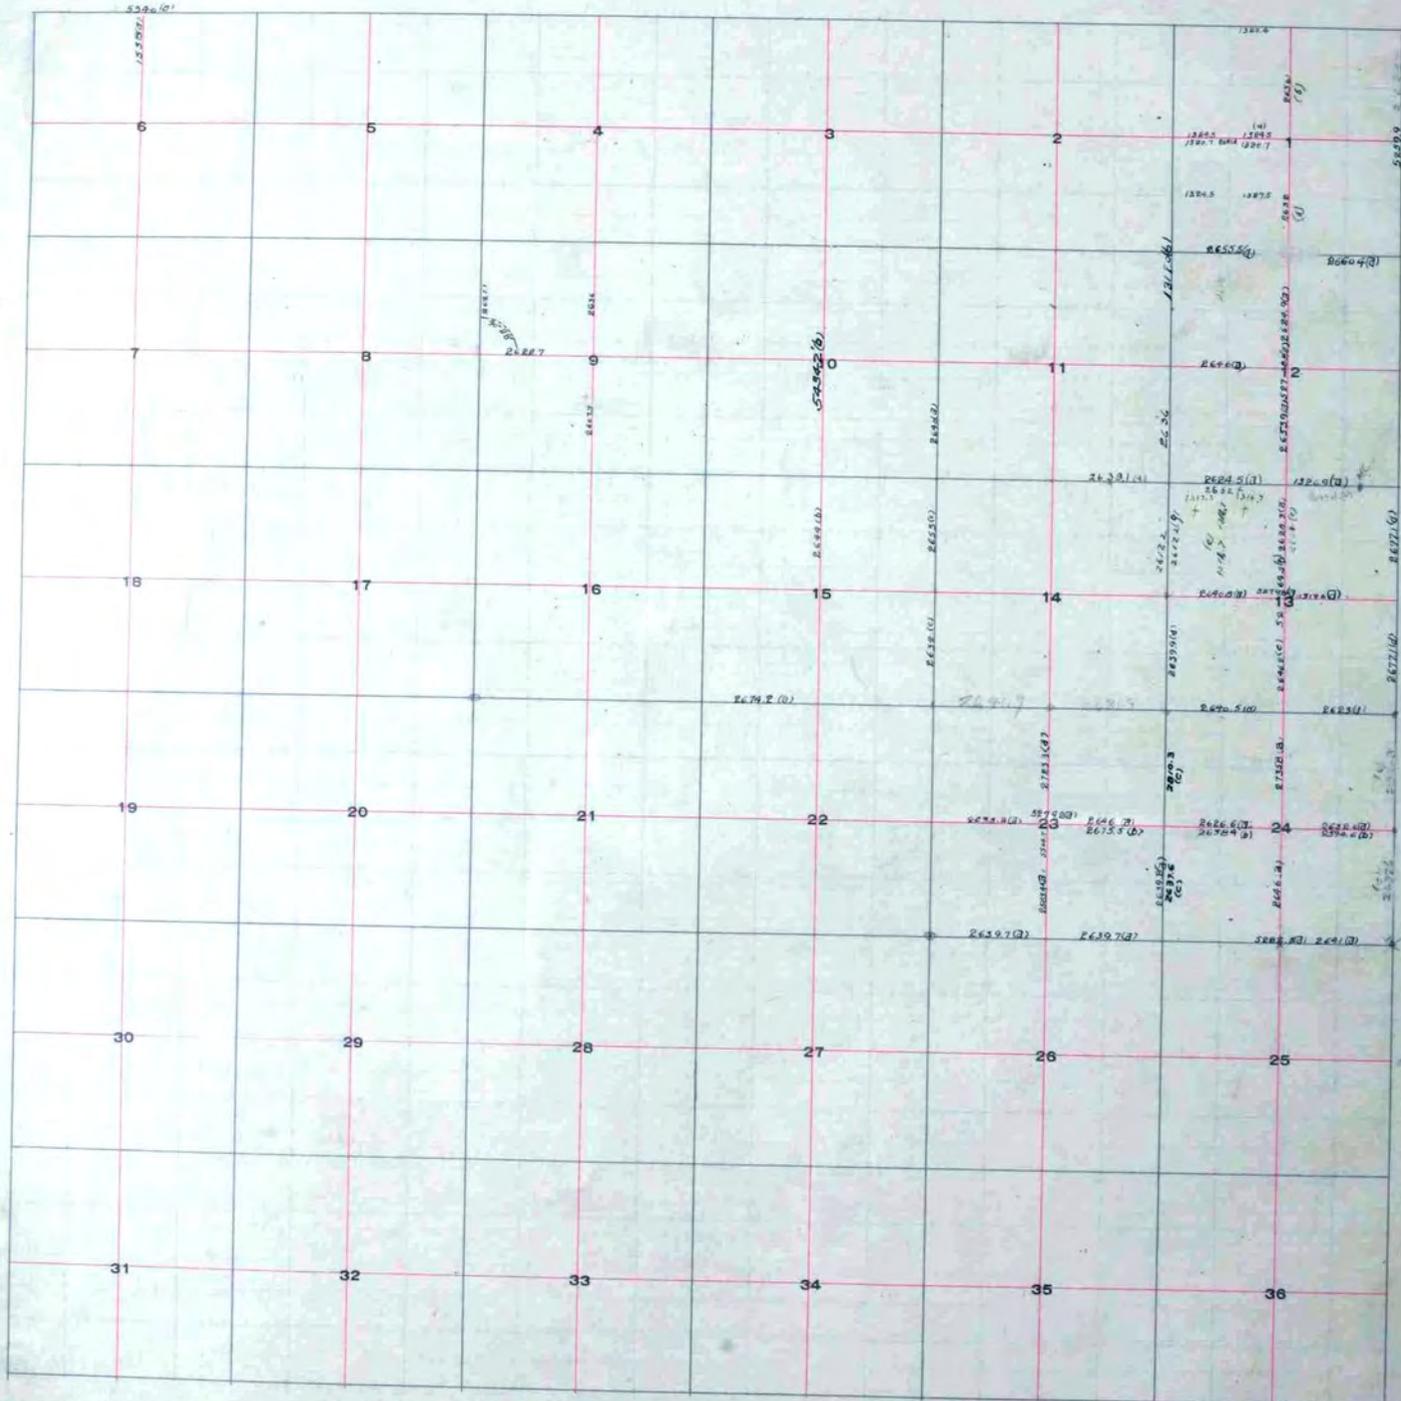

Text searching is available but will be of very little value due to the handwritten nature of this work and the references listed are merely to a volume and page number.

If you have any questions about using this index or suggestions or corrections please contact Keith Luna in the records vault.
