Lloyd H. Johnson
 County Engineer, Skagit County

NOTE ON NORTH 1/4 CORNER:

No Corner in evidence. According to evidence in County Engineer's Office, this Corner was tied into by the County and the distance from Corner to Secs. 23, 24, 25 & 26 to this corner was S 89° 54' W - 2551.34 Ft. Found a Fence Post set 103.0 Ft. West of County location of Corner, and someone had scratched "COR" on Post with a nail. No Scribe Marks. Old Fence comes into corner from East and ended 100 Ft. East of this Fence Post at a Hemlock tree with wires wrapped around tree. This Fence Post had been in place approximately 6 to 8 years as near as I could tell. No Survey marks at or near Corner. Re-established Corner by using County Data and end of existing Fence Line.

Charles Miens, who was badly crippled up with arthritis, told me that the Corner was at the approximate end of the old fence line, and at the point where old Timber Cuttings were separated from newer Cuttings. He was in such shape he could not make a trip up to show us this point. However, this checked fairly close with where we re-established the corner. Also, he told us that the center-line of the Section would fall from 12' to 16' East of his East line at the road and this also proved correct when we ran our line down. Also, we went between two buildings, close together, on Ed Miens place, and Ed told us the line would pass between these two buildings before we ever started our North-South center-line. He told me that John Meehan had run this line for his father.
