Bailing out after a record high water, Skagit county was finding late this week that its losses were not as great as the first frantic press and radio reports indicated.

This could be said in particular as to livestock—possibly 300 head—without minimizing the severity of the water, sand and drift damage to lands and crops and of loss to hard-hit individual farmers.

**Will Be “Days” Before Water Goes Down**

Hamilton residents were swamping out their homes and stores today in the first-flooded community but in the second, Conway, it was to be a matter of days before there could be hope of relief from overflow waters.

The flood-breeding combination of a Chinook wind and heavy, warm rains last Thursday night set the Skagit river off on its 1951 rampage. By Sunday morning it had risen to what the county engineer’s office said was an all-time high of 28.2 feet in Mount Vernon, as against the previous, November 1940, record of 26.05.

**WORSE AT CONWAY IN ‘51**

Conway residents declared the 1951 flood was two-thirds ten inches below the 1921 inundation in their community, due probably to the fact that this time the Fisher’s slough dikes broke southward before the South Fork river dikes gave way.

**THOUSANDS HELP ON DIKES**

That greater losses were not sustained was due in large part to valiant efforts of thousands of volunteer workers who patrolled and sandbagged dikes throughout Saturday, Sunday and Monday. Bolstered Sunday by Whidbey Naval Air station navy men, Fort Lewis army engineer units, and national guardsmen, these forces kept the dikes of the critical Riverside and Burlington Bend areas virtually intact, staved off gravely threatened Fir Island between the north banks of the North Fork.

**“CLOSE CALL” IN CITY**

In Mount Vernon Saturday night Main street was sandbagged when the water crept to within six inches of spilling over into the business district, 7000 sandbags were piled on the dikes and bottoms around the sewage disposal plant, and overflowing waters were dammed off with sacks on the West Side. Anacortes policemen and Mayor Joe Hagan came over to help.

**15,000 ACRES COVERED**

A total of 10,000 acres south of Mount Vernon and 500 in the Nooksacks and upriver were inundated, Harold Strombom flood-fighting coordinator for the county estimated. Fir Island between the South Fork and Dry Slough, however, escaped serious flooding, but waters from the Conway breaks flowed eastward to the foothills and northward to within two miles of Mount Vernon.

**REBUILDING HELP SOUGHT**

Seeking help in rebuilding dikes, diking district commissioners went to Seattle Wednesday and obtained a promise from US engineers and state officials of conferences on the spot here next week to discuss steps to be taken.

**HIGHWAY STILL CLOSED**

It may be a week to ten days, at least, before draining of the great basin south of Mount Vernon, that has the Pacific highway blocked, may be hoped for, oldtimers and county officials agreed. No one seemed to have any definite idea as to how the draining could be accomplished as far as any direct steps were concerned.

**BUILDINGS LOST**

In terms of losses, the flood cost one substantial house, that on the George Moore place just below the North Fork bridge, farm buildings there, a granary on the Von Moos place—it drifted out into the Sound—and numerous smaller buildings, including collapsed garages and chicken houses in Conway.

**WATER SYSTEMS HIT**

Conway lost its water system when the submarine main crossing the South Fork to serve island farms broke. Divers Tuesday were hunting for the broken mainland end of the line to plug it and permit resumption of water service to the town.

The PUD resorted to pumping and filtering river water when flood waters bared its 14-inch high-pressure “mountain water” main on the Dollar road between Sedro Woolley and Burlington Sunday. The line burst, speeding the washout of one road lane for a distance of 1000 feet. A settling PictSweet cannery wall that broke a six-inch water line in Mount Vernon
LOSSES SLOW IN RECORD FLOOD

(Continued from Page 1)

further reduced pressure here Sunday night. Temporary repairs to the Dollar road line were completed Wednesday.

DOLLAR ROAD OPEN SOON
The Dollar road will be reopened by this weekend, Stroombom predicted. The road above Hamilton was reopened Tuesday night.

2 BRIDGES WRECKED
Other county road department losses included the 160-foot freshwater Slough bridge on Anderson island below Conway, a buckled new bridge to Cockerham island near Lyman, washed and heavy debris on Francis road in the Nochamps, due to be cleared today; a shear wall on the North Fork bridge, both drawn rests on the South Fork bridge.

CONCRETE FERRY RETRIEVED
The concrete ferry, washed away Saturday, was found and towed back Wednesday. With a new deckhouse, it will be back in service this weekend. Faber ferry may remain closed another day or two while a mudslide is being cleared on the south side.

There were numerous small washouts on the new South Skagit highway but the road was open throughout, one-lane at some spots.

One small county bridge floated to the Sound, was taken in tow and tied up there, but can not be brought back upriver.

Also down the Skagit "drain" went several large oil and gasoline tanks, from immediately north of Mount Vernon.

TELLESBO FARM HARD HIT
Reports to the county engineer’s office Wednesday were that the Joe Tellesbo farm, between Brown’s and Dry sloughs, was ruined, by sand, logs and gullies. It was reputedly one of the best pieces of farm land in the county.

NO LOSS ESTIMATE YET
Any dollar estimate of the flood’s damage could be no more than a “wild guess,” competent judges declared.

“FARMERS WILL COME BACK”
As far as the flood’s effect on the county’s economy, it will be felt, but Skagit farmers generally find a way around such difficulties and “pull through,” H. A. Moldstad, vice-president and manager of the First National Bank of Mount Vernon, said Wednesday. He pointed out that most farmers were little if any in debt and those hit by the flood in most instances would be able to finance themselves until the next harvest.
