

**Skagit County 2017-2018 Request for Proposals (RFP)  
Homeless Crisis Response System & Low-Income Housing**

*Questions submitted by Agencies; Answers Provided by Skagit County Public Health*

*February 17, 2017*

**Q. Why has the County required a “strong preliminary description of shelter plans, number of beds, potential sites and/or expansion areas, and possible community partners and other funders” if the low-barrier shelter money is supposed to provide funding to answer these questions?**

A. The County expects the applicant will have done some initial work to brainstorm possible options for the shelter. The County does not expect these “preliminary” descriptions to be final, but is interested in seeing that some time and thought has been put into the concept and the number of beds needed based on local data. The County expects the applicant to present some possible options it would pursue if funding was granted. For instance, the proposer could name potential other funders that *may* be interested in the project, and if funding is received, use those funds to pay for staff to approach those funders. The County would understand that all this information would be preliminary

**Q. Do all of CHG’s guidelines now apply to document recording fee funding? Or are the only two requirements of doc fees 1) Coordinated Entry Participation and 2) HMIS?**

These are the only two requirements coming from CHG, pending further changes by Commerce. The County reserves the right to add additional language to contracts prior to executing an award. For example, the County will require adherence to all applicable state and federal laws, an ability to meet insurance requirements, and other items related to contract execution, monitoring, and enforcement.

**Q. The RFP states that land and pre-development expenses are eligible under limited circumstances. Can you explain this further?**

The County has limited capital dollars to allocate for affordable housing, and we must use those funds diligently. There are often other sources of pre-development funds available for capital projects and prior to issuing an award for pre-development, the County would want to see a clear demonstration of why those funds were not accessible or not an appropriate fit for the project. Additionally, the County would want to see information that suggested a strong likelihood of success in securing the remaining capital dollars.

*February 10, 2017*

**Q. Is there a period of time during which income eligibility does not have to be verified if the household is homeless at intake?**

A. Yes, if CHG Guidelines stay the same. Skagit County defers to CHG guidelines on rental assistance requirements.

**Q. Will contracts have specific language about audits for Fair Housing law compliance?**

A. There will be language about requirements for complying with Fair Housing law.

**Q. Will affordable homeownership be an eligible use of Affordable Housing funding?**

A. Yes, if households served are below 50% AMI. Per statutory guidelines, there will be a priority placed on programs that serve households at 30% AMI and below.

**Q. For affordable homeownership, at what time period is income eligibility determined?**

A. At the time of the household's application for housing; Skagit County defers to other funders on this matter.

**Q. With Rental Assistance funding, are there mandated percentages between Rapid Re-Housing, Case Management, etc...**

A. No, so long as the project complies with any CHG guidelines on this matter.

**Q: In the document recording fee section of the RFP, the language is consistent with CHG that some guidelines are set by State Commerce, and that Skagit must accept those requirements - what are these requirements?**

A: Programs must accept referrals exclusively from coordinated entry and enter participant data into HMIS. CHG guidelines—and these requirements—are subject to change.

**Q: Does a program need to specify if we are requesting funds from doc fee vs. CHG, ESG, etc.?**

A: No. However, please indicate in your narrative whether you are able to comply with CHG and/or ESG guidelines.

**Q: How does the \$300,000 of funding for emergency shelter programs compare to past RFPs?**

A: This funding is comparable (slightly higher) than the amount allocated in 2016 through the Document Recording Fee & CHG competitions.

**Q: There is a statement that states that award expectations/requests should be governed by previous award allocations. If so, should we expect awards consistent with the last allocation - when doc fee was at its lowest, or previous cycles - when it was more normal?**

A: This statement may be unclear. The County intended to say "Funding buckets are based on 2016 allocations for each service. Individual agency proposals will be considered on a competitive and merit-based basis. Past award levels do not necessarily predict future funding levels."

**Q: Can companies from outside the United States apply for this funding?**

A: No.

**Q: Do companies from outside the United States need to be present for application meetings?**

A: Companies from outside the United States are not eligible for funding.

**Q: Can we perform the tasks (related to the RFP) outside the United States?**

A: No.

**Q: Can we submit the proposals via email?**

A: Yes, proposals can be submitted to Kayla Schott-Bresler at [kaylasb@co.skagit.wa.us](mailto:kaylasb@co.skagit.wa.us).
