

Vendor Conference Questions – March 5th, 2019

QUESTION:

In section 6.0 requirement 6.12.2 says that the system is required to use wristbands that provided by DataWorks. Can a different brand be submitted for consideration?

ANSWER:

The RFP requires that the proposal support the DataWorks wrist band. So this must be a capability of the proposed system and must be addressed as part of the RFP response.

However, the RFP also provides under section 7 the ability to suggest optional features that would be of benefit or interested to Skagit County. Alternatives to our minimum requirements should be discussed in this section.
