Update #4 – March 21

<u>Is it your expectation that each of the GIS features be handled directly from within the CMMS?</u>

A: The expectation is that any GIS integrations that the solution has, requiring Skagit County GIS data and services, are compatible with Skagit County's Geographic Information System.

<u>If a CMMS does not have all the listed GIS features would this be disqualifying?</u>

A: There are no GIS requirements that are disqualifying. Please review Minimum Requirements in the requirements section.
